MFE CYBER SECURITY WARNING

This email originated from outside our organisation. Please take extra care when clicking on any links or opening any attachments.

Dear Aaron

I wanted to follow up regarding the in-person workshop we proposed during our upcoming visit to New Zealand.

Gayle has now confirmed a meeting with the EPA on 24 March from 9:00–10:30, and we are working on the rest of the schedule for that week. As we will already be in Wellington, we would very much appreciate the opportunity to dedicate time to a working session with MfE during the same period.

Ideally, we would still hope to allocate two half-days for a substantive discussion, but we are happy to work around your team's availability and structure the session in whatever way would be most useful following your initial review of the materials.

Many thanks again for your continued engagement and we look forward to progressing the discussion.

Kind regards,
Sharon

Dear Aaron,

I hope you are well.

Following our recent correspondence, please find below a link to the materials we prepared in response to the Ministry's request. The materials include the Economic benefits to NZ report as well as an MCFS technical report: 9(2)(ba)(i)

In line with our previous exchange, we would very much welcome the opportunity to hold an in-person working session with the Ministry during our upcoming visit to New Zealand. To focus the discussion, we propose holding two working sessions, each lasting several hours, ideally on two separate days. At this stage, we plan to be in Wellington between 24-26 March, and would be grateful to know if any times during those dates work for your team.

Since we are also planning meetings with other relevant officials and the EPA during the same visit, confirming your availability would be very helpful so we can coordinate the broader schedule accordingly.
