Importance: High

Hi David,

Just getting in touch re the GB briefing. Letting you know I am thinking about pushing it back another couple of weeks. But can make decision after manager review today.

Some comments from EPA on the GB briefing attached. **9(2)(h)** and also raise some uncertainty with the status quo regulatory framework. Although that is a little out of scope of what the briefing was set up to achieve, it could be valuable.

The briefing had a peer review yesterday (you'll see the comment on the purpose heading in the document linked in your meeting invite) and is also being reviewed by CC manager this morning.

Cheers,

Matt
