Provide documents that show that the contents and proposals on the web page comply with sec 29 Magna Carta. as well as Bill of Rights 1688. The Trespass act, Crimes Act (in relation to nuisance)

Does any of the proposals involve the use of aerosol/ welsbach materials/ geo-engineering/ chemtrails/SRM solar radiation management.activities?

If so when were they authorised? And by whom? As the facts appear that Chemtrailing has already occurred over the area known commonly as "new zealand".

I don't consent.

yours sincerely, s 9(2)(a)
