Subject: weather modification in New Zealand

Hello there Simon,

Congratulations on your success getting into parliament last year.

Something as Climate Minister you need to be aware of, that is our skies and what is happening in them.

There are 2 NZ Facebook pages with a total of 30k members, all concerned with what is going on in our skies.

Call it cloud seeding, weather modification, or chemical trails, it's a thing and it is happening here in New Zealand.

The photographs posted from all over New Zealand, along with international information on Aluminium, Barium, and other chemicals seem to be getting sprayed into our skies by either the military or Blackrock contractors.

I'm sure you have heard of HAARP. The ionising of our skies, the white out of our skies, the long white chem trails which are obvious to most has to stop. This is not the kiwi way.

If this is part of the Paris Climate Accord I suggest we leave it, and do our own thing. People (including yourself and your family) are breathing these chemicals in causing all sorts of health problems for people across the country.

I attach a couple of credible videos from back in 2012 mainly to do with the USA, but over the last decade we have all noticed the change. I truly believe that this is part of the Climate Change agenda to convince people the climate is warming. The scientist behind this when questioned in the early days said, they have no idea what the long term effect will be on people. In a nutshell we are getting poisoned and microwaved.

<https://www.geoengineeringwatch.org/>

Putting millions of tons of particulates into our sky is not the answer.

CO2 is the life blood of the planet. We are all made of carbon. Reducing CO2 any lower is going to stop plant life, along with what falls on the ground that the trees suck up kills them. Listen to this forensic arborist from California.

<https://www.youtube.com/watch?v=mHeoalh7cx8> This guy is really interesting.

Also co-founder of Greenpeace Patrick Moore has this to say:

<https://www.youtube.com/watch?v=TjlmFr4FMvI>

I hope you take the time to watch these videos and educate yourself on the real problem out there. Its only 3 years until the next election...

A response would be nice, but I don't hold out much hope of one.

Regards

Concerned Kiwi.
