The abatement is still in place, they have done the work that was requested and installed a new lined cell with a water treatment system.
We have an independent company taking water samples so we can make sure it has worked.

Looks like it has as the levels have dropped a lot, going to take some time for things to work through the soil so we extended the abatement by three months to allow us to keep an eye on it.

9(2)(g)(i)

Any questions just give me a shout, my mobile is 9(2)(a).

Cheers

Jackie

Hi Jackie,

Hope all is ok with you, 9(2)(g)(i)

The Taylorville landfill issue has come up at this end.

Is the EPA still involved? Is there anything you can update me on regarding what's happened over the last 6 months or so since we last talked?

Its quite urgent – today if possible?

Let me know if you have a minute, and we can chat on Teams

Cheers

Rob
