Hi everyone.

Attached is a paper for our discussion tmw, and an agenda is below.

We've put some indicative 'work in progress' drafting in one column, and the second column cross references this to the key points from the ESEG paper from last week.

We've then picked out the issues that need discussion. We intend to focus discussion on these 3-4 key issues. The intention that, if we aren't lined up on some options (or some matters of detail) , we ensure the discussion paper clearly 'front foots' the issues and alternative options you raise for further feedback through the public consultation process.

We look forward to a good meeting, Daniel
