FTC #35: Application for referred projects under the COVID-19 Recovery (Fast-track Consenting) Act 2020 – Stage 1 decision to 23 December 2020

Key Messages

- We are seeking your decision on two Stage 1 applications for referral of projects to an expert consenting panel (panel) under the COVID-19 Recovery (Fast-track Consenting) Act 2020 (FTCA), for:
 - Faringdon South West and South East Development Project by Hughes Developments Limited, and
 - The New Dunedin Hospital Whakatuputupu by the Minister of Health and the Ministry of Health.
- This briefing seeks your decision on providing the applications to, and inviting comments from, Ministers listed in section 21 (6) of the FTCA, relevant local authorities, Waka Kotahi NZ Transport Agency (for The New Dunedin Hospital - Whakatuputupu Project) and seeking further information from the applicants.

Faringdon South West and South East Development Project

- Hughes Developments Limited has applied under section 20 of the FTCA, for the Faringdon South West and South East Development Project to be referred to a panel. This Project involves the following development in two blocks of land in Faringdon, Rolleston known as Faringdon South West (FSW) and Faringdon South East (FSE):
 - subdivision of land to develop between 864 and 1,153 lots
 - construction of up to 1,151 new residential units
 - construction of two commercial neighbourhood centres
 - construction of local infrastructure including reserves and a road network with pedestrian and cycle linkages.
- 4. The Faringdon South West and South East Development Project is an extension of the existing Faringdon residential development undertaken by the applicant under the provisions of the Housing Accords and Special Housing Area Act (HAASHA). The applicant received the approval to proceed as a Special Housing Area in 2016.
- 5. Rolleston is an area of Greater Christchurch which is experiencing high levels of housing growth and a projected land supply shortage. Chapter 6 of the operative Canterbury Regional Policy Statement (CRPS) currently limits the ability for Selwyn District Council to rezone additional land in Rolleston for housing and the same limitations apply to growth areas within the Waimakariri District.
- 5. Councils' within the Greater Christchurch area have undertaken a range of strategic planning work to plan for housing growth through the Greater Christchurch Partnership¹. This strategic planning work is intended to inform a change to Chapter 6 of the operative CRPS (Recovery and rebuilding of Greater Christchurch) to identify new urban housing development areas in Rolleston, Rangiora and Kaiapoi. Once operative, it will enable District Councils to rezone land within these areas to meet shortfalls in housing capacity.

¹ The Greater Christchurch Partnership includes Environment Canterbury, Te Rūnanga o Ngāi Tahu, Canterbury District Health Board, Christchurch City Council, Waimakariri District Council, Selwyn District Council, Waka Kotahi NZ Transport Agency, Department of Prime Minister and Cabinet (Greater Christchurch Group).

- 7. You have previously given approval to use the Streamlined Planning Process to change Chapter 6 of the CRPS. This change in the CRPS has not yet been notified as further strategic work is being undertaken by the Greater Christchurch Partnership to enable consideration of the implications of the National Policy Statement on Urban Development 2020.
- 8. Hughes Developments Limited lodged a private plan change request (Plan Change 64) to rezone the subject site from Rural Inner Plains to Living Z zone in the Operative Selwyn District Plan. Four of the eleven submissions received on Plan Change 64, including a submission from the neighbouring Christchurch City Council, oppose the plan change. The site's current rural zoning does not prohibit development of the site for urban purposes.
- 9. We recommend that the Greater Christchurch Partnership partners are invited to comment on the application referral due to the collaborative nature of the strategic planning work to plan for growth in Greater Christchurch between the agencies and the scale of the proposed Faringdon South West and South East Development Project.

The New Dunedin Hospital - Whakatuputupu Project

- 10. The Minister of Health and the Ministry of Health have applied jointly under section 20 of the FTCA, for The New Dunedin Hospital Whakatuputupu Project to be referred to a panel.
- 11. This Project involves construction of the New Dunedin Hospital Whakatuputupu, including:
 - inpatients and outpatients buildings (Cadbury and Wilsons Blocks)
 - a helipad
 - vehicle access and car parking
 - air bridges over St Andrew Street and Castle Street
 - construction dewatering and site preparation works including earthworks disturbing potentially contaminated soils
 - notice of requirement for a designation for the New Dunedin Hospital Ancillary Services Building (Bow Lane Block).
- 12. The New Dunedin Hospital Whakatuputupu Project also requires the following additional approvals:
 - archaeological authorities from Heritage New Zealand Pouhere Taonga (Heritage New Zealand) as the site is a brownfield site developed prior to 1900. These have been obtained for all works on the Wilsons Block and the Bow Lane Block and an application for the Cadbury Block has been lodged
 - approval from Waka Kotahi NZ Transport Agency (NZTA) to construct and occupy land for air bridges over the State Highway designations for St Andrew Street (D465) and Castle Street (D453)
 - approval for temporary encroachment of roads under the Government Roading Powers Act 1989 during construction
 - trade waste consent from Dunedin City Council for construction dewatering discharge
 - an outline plan for the Dunedin Hospital Ancillary Services Building
 - building consents.

Summary analysis

13. We have undertaken an initial (Stage 1) analysis of the applications and recommend you progress both Projects to the next stage.

- A summary of the analysis and our recommendations for the applications is provided in Table
 A. You are the sole decision maker for these projects (these are not in the coastal marine
 area).
- 15. Table B indicates how applications we have received for referred projects under the FTCA are advancing through the fast-track process. Table C indicates progress of Listed Projects received by the Environmental Protection Authority. We will continue to monitor and report progress to you.

Action Sought

16. Please indicate your decision on the recommendations for the applications listed in Table A.

Signature

Madeleine Berry Acting Manager – Fast Track Consenting

Table A: Stage 1 initial assessment of project eligibility – projects where the Minister for the Environment is the only decision maker

[under s18(3)]	Economic benefits and costs for people or industries affected by COVID-19 [s19(a)]	Effect on social and cultural wellbeing of current and future generations [s19(b)]	Likelihood the Project will progress faster under the FTCA than would otherwise be the case [s19(c)]	Public benefit [s19(d)]	Potential for significant adverse environmental effects, including greenhouse gas emissions [s19(e)]	Any other relevant matters [s19(f)]	Recommendation	Decision
Project name Faringdon South West and South East Development Applicant Hughes Developments Limited Location Selwyn Road, Rolleston Background The Project is an extension of the existing Faringdon residential development undertaken by the applicant under the provisions of the Housing Accords and Special Housing Area Act (HAASHA).	The Project is to subdivide land and construct residential development, two neighbourhood commercial centres, reserves, roads, walking and cycling infrastructure, servicing infrastructure and associated earthworks. The Project includes: • a subdivision to create up to 1,153 lots • construction of up to 1,151 residential units • construction of two neighbourhood commercial centres • construction of local recreation reserves • construction of a road network with pedestrian and cycle linkages • construction and upgrade to three waters infrastructure • earthworks (including bulk earthworks) and associated discharges.	The applicant proposes to fund the development from existing cash reserves and pre- sale of residential sections. The applicant notes a high demand for residential sections, with all 274 residential sections released in Faringdon South East (FSE) being pre-sold.	No, as based on available information, the Project does not: • include any prohibited activities • include land returned under a Treaty settlement • occur in a customary marine title area or protected customary rights area under the Marine and Coastal Area (Takutai Moana) Act 2011.	The applicant estimates: • approximately 9,800 full-time equivalent jobs will be created over a 7-year planning and construction period • a further 400 jobs each year will be created in the Canterbury region following the completion of the Project. However, detail of these jobs including whether they are FTEs and detail of the sectors they are in is not provided • the delivery of the Project will contribute approximately \$668 million in GDP during the development period • approximately \$17 million in GDP per annum will be added following the completion of the development.	The Project will provide for the social wellbeing of current and future generations as it will: • provide an additional housing supply of up to 1,151 residential units in an area that has been rapidly growing and has a projected shortfall in housing capacity • deliver supporting community infrastructure such as walking and cycling ways, neighbourhood centres and reserves which will facilitate community connection and provide opportunity for physical activities, and access. • the applicant notes that the Project will not have any adverse effects on cultural wellbeing, but they do not explain how the Project will provide for Te Ao Māori cultural well-being.	The applicant considers that the fast- track process is likely to be faster than standard RMA processes by approximately 2 years due to the potential for notification and Environment Court appeal/s. We note that applications for increased density development in rural zones may be notified and/or subject to appeal under standard RMA processes. It is estimated that the fast-track processes will enable the Project to progress sooner by at least 2 years than if consents were sought through standard RMA processes (section 19(c) of the FTCA). Feedback will be sought on the use of the FTCA or standard RMA processes from Selwyn District Council and Environment Canterbury.	 Based on the information provided, the Project may result in the following public benefits: generating approximately 9,800 FTE Jobs in engineering, design and construction increasing housing supply by up to 1,151 residential units providing walking and cycling ways, neighbourhood centres, and reserves to facilitate community connection, physical activities, and access to outdoor green spaces. These infrastructure facilities are likely to make a valuable contribution to a well-functioning urban environment. 	The Project has the potential for adverse environmental effects including: • loss of rural production land • expanding the Rolleston town centre outside the existing zoned urban area • dust, traffic and other temporary construction effects. There are no dedicated public and active transport routes along the proposed sites. However, the application proposes a layout that has provision for pedestrian and cycle ways and is conducive to supporting future public transport. The applicant has provided details of mitigation measures to address potential adverse effects and has confirmed that technical specialists have completed a range of necessary assessments. The applicant advises that none of the environmental assessments undertaken for the Project conclude that the proposed activities will result in significant	A change to Chapter 6 of the operative CRPS (Recovery and rebuilding of Greater Christchurch) is being prepared. This change to Chapter 6 of the CRPS is expected to implement strategic work being prepared by the Greater Christchurch Partnership and identify new housing development areas in Greater Christchurch including Rolleston. You previously approved use of the Streamlined Planning Process for this change to Chapter 6 of the CRPS which is expected to be notified in March 2021. The applicant has lodged Plan Change 64 to the Operative Selwyn District Plan, which proposes to rezone the land from Rural Inner Plains to Living Zone 1 in the Selwyn District Plan to enable urban development. Four of the eleven submissions received on Plan change 64, including a submission from the	 a. Note that section 23(3) of the FTCA permits you to decline an application for referral without inviting comments on an application from the relevant local authorities and any relevant Ministers. b. Note that the application has not been provided to or had any comments sought from relevant local authorities or relevant Ministers and that you are required to do so if you do not decline an application under section 23(3) of the FTCA. c. Note that section 21(3) of the FTCA permits you to forward an application to, and invite written comments from, any other person. d. Note that section 22 of the FTCA permits you to request further information from the applicant at any time before you decide whether to accept or decline an application. e. Agree to progress the Faringdon South West and South East Development Project to Stage 2 of the process. The Project warrants further analysis because it has potential to achieve the purpose of the FTCA. f. Agree that the application is to be provided to, and that you invite comments from: 	Yes/No Yes/No

Location 280 and 336 Cumberland Street (Cadbury Block) 360 and 398 Cumberland Street and 168 Castle Street (Wilsons Block) 69 and 81 Castle Street and 168 Castle Street (Bow Lane Block) 31 Anzac Avenue Road reserves - St Andrew Street, Castle Street	contaminated soils, construction dewatering and notice of requirement for a designation for the purpose of New Dunedin Hospital Ancillary Services Building (Bow Lane Block). The Project works included in the resource consent application include: • an inpatient building up to 58 metres in height with a floor area of approximately 72,500m ² and helipad providing acute specialist services, emergency intervention, diagnostic services, acute and elective surgery, medical and surgical inpatient care, paediatric and maternal inpatient care, and related clinical support services and helipad (Cadbury Block) • an outpatient building up to 26 metres in height with a floor area of approximately 12,970m ² comprising consultation and treatment spaces, day surgery facilities, and procedure and diagnostic services (Wilsons Block) • a single level air- bridge and one three-level air-bridge over St Andrew Street connecting the inpatient and outpatient buildings • a single level air- bridge over Castle Street connecting	demolition, piling, project management and early contractor engagement. The final business case for remaining funding is expected to go to Cabinet for consideration in February 2021.	rights area under the Marine and Coastal Area (Takutai Moana) Act 2011.	 87 indirect jobs resulting from construction spend in the wider economy associated housing demand for 300 workers estimated to move into Dunedin to meet demand based on work by Sapere Research Group, the health workforce in Dunedin is expected to increase over time due to demand for health services from an ageing population. No employment forecast details are available. Sapere estimates that over its 10 year construction period, the new Dunedin Hospital will add another \$424.9 million gross domestic product to Dunedin's economy and \$246 million in additional household income. 	 the building design seeks to ensure that tikanga Māori can be upheld in relation to healthcare, functional spaces for cultural traditions, arrangements for deceased persons and increases visibility of Te Rūnanga o Ōtakou's history and values acting as a catalyst for a wider skills training programme (Workforce Central) to develop trades including cross agency support from the Ministry of Social Development, the Department of Corrections, Tertiary Education Commission, Immigration New Zealand and the Ministry of Education. The Workforce Central Programme has grant funding from the Provincial Growth Fund and proposes to incorporate improved earning and social outcomes for Māori, Pasifika and disadvantaged groups. The Project may create pressure/high demand on housing during the construction phase in the short term. The applicant has indicated ongoing engagement with Kai Tahu and Aukaha. 	The application states that the fast-track consent process will enable the economic and employment benefits of this Project to be realised at a time where forecasts indicate that the economic and employment impacts of COVID-19 are likely to be at their most severe. We note that developments involving large scale buildings such as hospitals and helipads tend to receive a high level of public interest. Feedback is recommended to be sought on the use of the FTCA or standard RMA processes from Dunedin City Council and Otago Regional Council.	 827 FTE jobs over a four- year period covering engineering, design and construction providing health infrastructure to improve social, economic and employment outcomes creating training opportunities targeted at young people during the design and construction phases assisting to improve environmental outcomes for air quality by lowering the level of emissions generated from the existing Dunedin Hospital coal powered boilers. 	construction over State Highway 1 disturbance of potentially contaminated soil visual amenity effects of large- scale buildings and air bridges wind tunnel effects historic heritage effects traffic and parking effects effects on industrial land supply. A range of technical reports have been prepared by specialists to support the referral application. These reports include details of mitigation measures to address potential adverse effects including through building and overall project design, trees and landscaping to reduce wind tunneling, noise mitigation, best practice engineering and construction management mitigation, best practice engineering and construction management mitigation, managing groundwater discharge flow rates and quality. We note that the Minister does not require a full Assessment of Environmental Effects (AEE) and supporting evidence to make a	with the hospital which are mainly restricted discretionary activities and earthworks for Phase 3 site preparation and piling under the National Environmental Standard for Assessing and Managing Contaminants in Soil to Protect Human Health. Works and associated land use for the Bow Lane Block do not form part of the referral application. This portion of the site is in an Industrial Zone where uses ancillary to a hospital require a consent for a non- complying activity. The designation is proposed on this site to secure long term use of the land for a building and activities ancillary to a hospital use. Once this land is designated for a hospital use, a separate outline plan will be sought for buildings and works on this site. A heritage listed building 'Dairy and Machine House' is proposed to be retained on the site (located near inpatients building on edge of public car park). The resource consent granted for	 has not been provided to or had any comments sought from relevant local authorities or relevant Ministers and that you are required to do so if you do not decline an application under section 23(3) of the FTCA. c.
