

OIAD-112

9(2)(a)

[Redacted]

Dear 9(2)(a)

Thank you for your email of 17 August 2021 requesting the following under the Official Information Act 1982 (the Act):

For the purposes of the Forum, I am currently gathering as much information as possible regarding:

- *waste produced (general waste, food waste, textile waste and construction waste) in NZ during the past 10 years*
- *old landfills (not in use) and active landfills in New Zealand, along with maps showing the locations of these two classifications of landfills*
- *recycling plants currently in use and information on the type of waste being recycled at the plants*
- *projected recycling plants, those under construction and those planned for construction*
- *recycled items that are processed from waste and used within New Zealand (% of items produced, types of items)*
- *unprocessed recyclable material from New Zealand exported for offshore recycling, with countries of destination*
- *export figures for unprocessed waste, with country of destination (amount and type of waste)*
- *cost of processing various waste streams per tonne for different areas of New Zealand*
- *cost of recycling various streams of material per tonne for different areas of New Zealand*

The Ministry contacted you on 24 August 2021 to clarify your request. You responded on 26 August 2021 with a more detailed list and the following further questions:

- *Of all waste (domestic, industry, construction, farm etc) produced, how much is recycled?*
- *How much of the kerbside material collected for recycling is contaminated, and so has to go to landfill?*
- *From the recycle plants, where is the collected material sent to be processed into the final product?*
- *How much recyclable material stays in New Zealand, and how much is exported or stored for export?*
- *What types of items are processed in New Zealand?*

The Ministry for the Environment (the Ministry) has recently updated its website with estimates of waste generated in New Zealand and you can access this via:

<https://environment.govt.nz/facts-and-science/waste/estimates-of-waste-generated/>

At present, the Ministry does not hold full datasets for all of the information you have requested. A substantial work programme is underway to improve the availability of waste data in Aotearoa. Please see the Ministry's recently published work programme for more information about improvements to the availability and accessibility of waste data in Aotearoa: <https://environment.govt.nz/assets/publications/Waste-reduction-work-programme-final.pdf>.

In response to this aspect of your request: *waste produced (general waste, food waste, textile waste and construction waste) in NZ during the past 10 years*, the Ministry holds some data which has been provided below (document 1). We also hold data on the tonnage of waste disposed of to Class 1 municipal landfills. This tonnage data which goes back to 2009, is available in an aggregated form on the Ministry's website:

<https://environment.govt.nz/what-government-is-doing/areas-of-work/waste/waste-disposal-levy/calculations-of-waste-disposed-of-at-levied-disposal-facilities/>

Waste disposed of to other classes of landfill is not information the Ministry yet holds; however, regulations have recently come into effect which require all classes of landfills to report tonnage data on waste received at and diverted from the site, implemented in a staggered manner. Class 2 landfills start reporting tonnage data to the Ministry on 1 January 2022, with class 3 and 4 landfills on 1 January 2023. You can read more on the regulations here:

<https://www.legislation.govt.nz/regulation/public/2021/0069/latest/whole.html#LMS474669>

and here:

<https://www.legislation.govt.nz/regulation/public/2009/0144/latest/DLM2055712.html>

The Ministry does not yet hold data relating to the activity source of the waste received at all landfills, i.e., what activity produced the waste, such as construction and demolition activities, or industrial activities etc. In May 2021, Cabinet agreed to the development of regulations to require all classes of landfills to report the activity source of the waste received at and diverted from those sites. This work is in progress, and we hope to see the regulations come into effect in 2022. Councils conduct solid waste assessments at their landfills, which often contain data on the waste received at those sites. The council solid waste assessments are typically available online, and you can find some information at <https://www.qldc.govt.nz/services/rubbish-recycling/solid-waste-assessment>.

In response to this aspect of your request: *old landfills (not in use) and active landfills in New Zealand, along with maps showing the locations of these two classifications of landfills*: the Ministry holds information on the location of class 1 municipal landfills in New Zealand with those active or closed since 2009. This information has been provided to you in the table below (document 2). Below is also a map (document 3) which visualises the locations of the known open and closed (since 2009) class 1 municipal landfills. The Ministry does not hold data relating to class 1 municipal landfills that were closed prior to 2009.

The Ministry is currently identifying and locating all classes of landfill in New Zealand as part of the waste levy expansion project. In the spreadsheet provided below (document 4), there are current sites known to the Ministry as of 7 September 2021. Note that this is a work in progress document, and likely subject to change as we work to confirm details over the next

few months. The second map below (document 5) also shows the location of those sites. It is important to note with this information that:

- the identification of landfills in New Zealand is a work in progress, and therefore not complete.
- not all sites identified (in the spreadsheet and map) are landfills – some are transfer stations or fill farms.
- not all sites have locational information that can be mapped (all the sites in the spreadsheet may not be in the below map)
- not all locational information has been confirmed as accurate
- the status of sites (open/ closed) has not been confirmed as accurate as yet

Further landfill site information is available in appendix C of this report:

<https://environment.govt.nz/assets/Publications/Files/Measuring-Emissions-Detailed-Guide-2020.pdf#page=123>

In response to these aspects of your request: *recycling plants currently in use and information on the type of waste being recycled at the plants and from the recycle plants, where is the collected material sent to be processed into the final product.* The names and addresses of businesses that operate recycling facilities can be found online or via business directories. The information the Ministry holds on the specific types of waste accepted and processed at recycling facilities, as well as where it comes from is commercially sensitive and is withheld under the following section of the Act:

- s9(2)(b)(ii) – would be likely unreasonable to prejudice the commercial position of the person who supplied or who is the subject of the information.

In response to this aspect of your request: *projected recycling plants, those under construction and those planned for construction:* The Ministry does not maintain the information of recycling plants currently in use. We have provided a snapshot of the projected recycling plants supported through the Waste Minimisation Fund (WMF) and Covid response and Recovery Fund (CRRF) (document 6). This is limited to active WMF/CRRF projects that are currently in progress for new recycling facilities. The Ministry is unable to release information on requests received this year as that funding round is still in progress. Our website has some further information: <https://environment.govt.nz/what-you-can-do/funding/waste-minimisation-fund/waste-minimisation-fund-funded-projects/> .

In the table which details projected recycling plants, some information has been withheld under the following section of the Act:

- s9(2)(b)(ii) of the Act as this would likely be unreasonable to prejudice the commercial position of the person who supplied or who is the subject of the information.

In response to these aspects of your request: *recycled items that are processed from waste and used within New Zealand (% of items produced, types of items) and of all waste (domestic, industry, construction, farm etc) produced, how much is recycled?* The Ministry

does not hold data on types of items that are made from material that is recycled. We do however hold data on tonnages of waste diverted from class 1 municipal landfills to be reused:

- In 2019 (calendar year), the total tonnage of waste diverted from class 1 municipal landfills was 21,7696.1 (as of 3 September 2021).
- In 2020 (calendar year), the total tonnage of waste diverted from class 1 municipal landfills was 21,6691.1, as of 3 September 2021.

There is also information in this report, which you may find useful

<https://environment.govt.nz/assets/Publications/Files/national-resource-recovery-project-redacted.pdf>

In response to the following points of your request:

- *unprocessed recyclable material from New Zealand exported for offshore recycling, with countries of destination*
- *export figures for unprocessed waste, with country of destination (amount and type of waste)*
- *cost of processing various waste streams per tonne for different areas of New Zealand*
- *cost of recycling various streams of material per tonne for different areas of New Zealand*
- *How much of the kerbside material collected for recycling is contaminated, and so has to go to landfill?*
- *How much recyclable material stays in New Zealand, and how much is exported or stored for export?*

The Ministry does not hold data for this information, however NZ Customs Service and Stats NZ can be contacted to get this type of information. Waste disposal facilities may also hold information regarding operations costs. These points of your request are therefore refused under the following section of the Act:

- s18(g)(ii): that the information requested is not held by the department or venture or Minister of the Crown or organisation and that the information is connected more closely with the functions of another department.

Some councils may also hold information relating to kerbside material, apart from some which are collected via private contractors.

In response to this question: *what types of items are processed in New Zealand?* The Ministry commissioned a report in 2021 called 'National Resource Recovery – Infrastructure and Services Stocktake and Gap Analysis'. This report is withheld in full under the following sections of the Act:

- s9(2)(ba)(i) - protect information which is subject to an obligation of confidence or which any person has been or could be compelled to provide under the authority of any enactment, where the making available of the information would be likely to prejudice the supply of similar information, or information from the same source, and it is in the public interest that such information should continue to be supplied.
- s9(2)(b)(ii) – would be likely unreasonable to prejudice the commercial position of the person who supplied or who is the subject of the information.

Further information may be available via this website:

<https://www.recycle.co.nz/consequences.php>

In terms of section 9(1) of the Act, I am satisfied that, in the circumstances, the withholding of this information is not outweighed by other considerations that render it desirable to make the information available in the public interest.

You have the right to seek an investigation and review by the Office of the Ombudsman of my decision to withhold information relating to this request, in accordance with section 28(3) of the Act. The relevant details can be found on their website at:

www.ombudsman.parliament.nz.

Please note that due to the public interest in our work the Ministry for the Environment publishes responses to requests for official information on our [OIA responses page](#) shortly after the response has been sent. If you have any queries about this, please feel free to contact our Ministerial Services team: ministerials@mfe.govt.nz.

Yours sincerely

Glenn Wigley
Director, Policy and Regulatory, Waste and Resource Efficiency

Released under the provision of the Official Information Act 1982

How much waste is generated in Aotearoa New Zealand?

Aotearoa New Zealand is estimated to generate 17.49 million tonnes of waste per year, of which an estimated 12.59 million tonnes are sent to landfill. This estimate includes waste disposed of to classes 1, 2, 3 and 4 landfills, clean fills, and farm dumps. It also includes the materials recycled here in New Zealand and those sent offshore for recycling.¹

Waste sent to Class 1 landfills increased by 47 per cent from 2,499,571 tonnes in 2009/2010 to 3,682,419 tonnes in 2018/2019, with per capita waste increasing from 580kg to 740kg per annum.

While there was a slight decrease in 2019 and 2020, with the decrease in 2020 likely largely due to Covid, longer term trends suggest the rate of disposal is only increasing for many sites around the country.

What kinds of waste are going to landfill in New Zealand?

Surveys have been undertaken to estimate the composition of waste going to class 1 landfills. These are landfills that accept household waste. Construction and demolition waste is the largest source of waste to class 1 landfills at 33% followed by potentially hazardous waste at 24% and then organic waste at 15%.²

¹ Online Waste Levy System, ND; and adapted from* MfE, 2016 & MfE, 2014

² Improvements to estimates of greenhouse gas emissions from Landfills Eunomia 2020

Composition of waste to Class 1 landfills in 2018	% of total	Tonnes/annum - 2018
Paper	5.9%	218,211
Plastic	8.3%	308,169
<i>Putrescibles - Kitchen & other</i>	9.0%	333,881
<i>Putrescibles - Garden waste</i>	5.7%	212,747
Subtotal - Putrescibles	14.8%	546,627
Ferrous metal	2.7%	99,708
Non-ferrous metal	0.8%	30,438
Glass	1.8%	65,150
Textiles	5.0%	186,035
Sanitary paper	2.5%	91,551
Rubble & concrete	20.1%	744,092
Timber	12.6%	467,664
Rubber	2.1%	77,690
<i>Potentially hazardous - Sewage sludge</i>	1.9%	71,222
<i>Potentially hazardous - Other</i>	21.5%	798,271
Subtotal - Potentially hazardous	23.5%	869,493
TOTAL	100.0%	3,704,828

The composition of waste disposed of to class 1 landfills is estimated to change over time. Since 1950 food and garden waste to landfill has decreased from 28% to 15% and paper has decreased from 16% to 6%. ³Timber waste has increased from 7% to 12% and non-greenhouse gas emitting waste which includes plastics and other materials has increased from 45% to 57%.

Table 7.2.5 Estimated composition of waste to municipal landfills from 1950 to 2019

Year	Food (%)	Garden (%)	Paper (%)	Wood (%)	Textile (%)	Nappies (%)	Sludge (%)	Inert (%)	Notes

2019	9.0	5.7	5.9	12.6	5.0	2.5	1.9	57.3	Assumed same as 2018

What are we doing to improve waste data?

Improving data availability, accessibility and quality provides a stronger base for developing and evaluating policy and interventions, understanding changes over time and monitoring compliance. It will also support innovation and technology changes to address many of the challenges around waste faced in Aotearoa New Zealand.

We have begun a programme of work to improve our waste data. In May 2021, Cabinet agreed to additional mandatory reporting of waste data. In summary, data requirements already in regulation or agreed include:

- Tonnage reporting from:
 - Class 1 landfills (already in place)
 - construction and demolition fill sites (from 1 January 2022)
 - other sites taking materials from earthworks etc (from 1 January 2023)
 - industrial monofills (from 1 January 2023)

- transfer stations (from 1 January 2022)
- Activity source reporting of waste (i.e., what type of activity generated the waste, e.g., households, construction and demolition etc) – regulations now in development.
- Additional reporting by territorial authorities.

For a summary of the requirements in regulation see [Reporting requirements for waste disposal facility operators | Ministry for the Environment](#)
