

OIAD-172

s 9(2)(a)

s 9(2)(a)

Thank you for your email of 6 December 2021 requesting the following under the Official Information Act 1982 (the Act):

- 1. Copies of all correspondence between yourselves and the Otago Regional Council (ORC) concerning Plan Change 8 (including any correspondence etc relating to the Environment Court and any mediation) and the same for any correspondence etc concerning Plan Change 7.*
- 2. Notes of any meetings or other contact to do with either of the above plan changes between yourselves and ORC.*
- 3. Details of any calls as above between yourselves and ORC with times of calls, participants and the nature of the calls, ie what they were about even if there are no formal notes.*
- 4. These queries to cover all ORC staff, governors and contractors. The above inquiries are for the period 1/7/21 to today.*

The Ministry for the Environment (the Ministry) has identified 22 documents in scope of your request, as listed in the attached table. These documents comprise correspondence between the Ministry for the Environment (the Ministry) and Otago Regional Council relating to Plan Change 7, and are released to you in full.

The Minister for the Environment withdrew from Plan Change 8 proceedings on 24 June 2021. The Ministry has had no correspondence with ORC about Plan Change 8 since this withdrawal. Therefore, this part of your request is refused under section 18(e) of the OIA, as the information requested does not exist.

In response to parts 2, 3, and 4 of your request, the Ministry has identified one meeting in scope. Ministry staff met with Otago Regional Council Consents Manager Joanna Gilroy on 23 November 2021 via Microsoft Teams. Ministry staff in attendance were:

Alison Grayston, Analyst;
Macaela Flanagan, Senior Policy Analyst; and
Shannon Wallace, Principal Analyst.

The topics discussed at this meeting were:

- What the PC7 decision would mean for applications to re-consent deemed permits;
- What ORCs proposed timeframe was for processing consents; and
- How ORC would continue to report to the Minister/Ministry on its progress in processing these consents.

Notes from this meeting and forward actions are included in a follow up email. Document 22 below.

You have the right to seek an investigation and review by the Office of the Ombudsman of my decisions relating to this request, in accordance with section 28(3) of the Act. The relevant details can be found on their website at: www.ombudsman.parliament.nz.

Please note that due to the public interest in our work the Ministry for the Environment publishes responses to requests for official information on our [OIA responses page](#) shortly after the response has been sent. If you have any queries about this, please feel free to contact our Ministerial Services team: ministerials@mfe.govt.nz.

Yours sincerely

Hamish More
Acting Director – Delivery and Oversight

Deemed Permit Status

The Otago Regional Council's consent database currently contains data for 586 Deemed Permits. Their current status is:

- Cancelled: 23
- Current: 330
- Expired: 46
- In Progress: 1
- Surrendered: 186
- Total: 586

Note: Of the 330 Current Deemed Permits 40 have been replaced by 23 Resource Consents but have not yet been surrendered. Therefore they maintain a status of current.

Since 1 January 2016 the Otago Regional Council has granted 34 Resource Consents to replace 82 Deemed Permit. 36 of these Deemed Permits have been surrendered. The terms for the Resource Consents replacing these Deemed Permits are:

- 3 have been granted for a term of six years or less.
- 4 have been granted for a term of more than six years and up to fifteen years
- 27 have been granted for a term of more than fifteen years.

A further 205 Deemed Permits currently have applications underway to replace them with 162 Resource Consents. The applicants have applied for:

- 10 consents with a term of six years or less.
- 1 consents with a term of more than six years, and up to fifteen years
- 88 consents with a term of more than fifteen years.
- 63 consents with no expiry date currently recorded in the Otago Regional Council's consent database

There are currently 85 Deemed Permits for which no application has been lodged. Those deemed permits include 0 Permits to take and use Groundwater, 12 Permits to Dam Water, and 0 Permits to discharge to water. In addition to these Deemed Permits a further 54 Resource Consents are due to expire between 27 September 2021 and 8 October 2021.

Please note that these numbers present a snapshot of the Otago Regional Council's Resource Consent database on the day that this report was produced. As such, any of these numbers may vary up or down as new applications are received or granted, Deemed Permits are cancelled or surrendered, or applicants are able to prove they can meet the provisions of section 413 of the Resource Management Act (1991).

A summary of deemed permit replacement process in each catchment with current deemed permits is presented below:

Catchment.	Deemed Permits Awaiting Application	Deemed Permit Applications in Progress

Deemed Permit Status

The Otago Regional Council's consent database currently contains data for 586 Deemed Permits. Their current status is:

- Cancelled: 23
- Current: 330
- Expired: 46
- In Progress: 1
- Surrendered: 186
- Total: 586

Note: Of the 330 Current Deemed Permits 39 have been replaced by 22 Resource Consents but have not yet been surrendered. Therefore they maintain a status of current.

Since 1 January 2016 the Otago Regional Council has granted 34 Resource Consents to replace 82 Deemed Permit. 36 of these Deemed Permits have been surrendered. The terms for the Resource Consents replacing these Deemed Permits are:

- 3 have been granted for a term of six years or less.
- 5 have been granted for a term of more than six years and up to fifteen years
- 26 have been granted for a term of more than fifteen years.

A further 208 Deemed Permits currently have applications underway to replace them with 163 Resource Consents. The applicants have applied for:

- 18 consents with a term of six years or less.
- 2 consents with a term of more than six years, and up to fifteen years
- 124 consents with a term of more than fifteen years.
- 19 consents with no expiry date currently recorded in the Otago Regional Council's consent database

There are currently 83 Deemed Permits for which no application has been lodged. Those deemed permits include 0 Permits to take and use Groundwater, 12 Permits to Dam Water, and 0 Permits to discharge to water. In addition to these Deemed Permits a further 54 Resource Consents are due to expire between 27 September 2021 and 8 October 2021.

Please note that these numbers present a snapshot of the Otago Regional Council's Resource Consent database on the day that this report was produced. As such, any of these numbers may vary up or down as new applications are received or granted, Deemed Permits are cancelled or surrendered, or applicants are able to prove they can meet the provisions of section 413 of the Resource Management Act (1991).

A summary of deemed permit replacement process in each catchment with current deemed permits is presented below:

Catchment.	Deemed Permits Awaiting Application	Deemed Permit Applications in Progress
Albert Burn (1)	0	1
Amisfield Burn	1	2
Arrow River	1	
Bannock Burn	0	8
Basin Burn	0	4
Beaumont River	1	0
Bendigo Creek	0	0
Benger Burn	0	0
Black Jacks Creek	1	0
Burn Cottage Creek	1	3
Butchers Creek (1)	2	0
Cambells Creek	1	0
Camp Creek (1)	0	2
Cardrona River	1	9
Chapmans Gully	1	0
Coal Creek	6	0
Crook Burn (2)	0	1
Donaldsons Creek	0	0
Elbow Creek	0	0
Five Mile Creek (1)	1	0
Franks Creek	0	2
Fraser River	3	2
Kidd Creek	1	0
Lindis River	2	9
Long Gully (1)	0	0
Long Gully (2)	0	0
Lowburn Creek	3	13
Luggate Catchment	0	0
Manuherikia Catchment	10	44
Nevis River	0	2
No Catchment Recorded	14	6
Park Burn	1	1
Pipeclay Gully	0	1

Poison Creek	0	0
Pomahaka River	0	1
Quartz Creek	0	0
Quartz Reef Creek	0	1
Queensberry Hills	0	0
Rees River	0	1
Ripponvale Road	0	0
Roaring Meg	1	1
Schoolhouse Creek	0	1
Shingle Creek	9	0
Shotover River	1	0
Taieri Catchment	8	31
Teviot River	2	0
Tinwald Burn	0	2
Toms Creek	1	1
Unnamed Trib's of Clutha River above Lake Dunstan	2	1
Unnamed Trib's of Clutha River above Lake Roxburgh	0	2
Unnamed Trib's of Clutha River above Tuapeka Mouth	6	1
Unnamed Trib's of Kawarau River	0	2
Unnamed Trib's of Lake Hawea	1	0
Waikerikeri Creek	0	2
Waitahuna Catchment	1	0
Wanaka Township	0	3
Washpool Creek (1)	0	3

Deemed Permit Status

The Otago Regional Council's consent database currently contains data for 586 Deemed Permits. Their current status is:

- Cancelled: 23
- Current: 330
- Expired: 46
- In Progress: 1
- Surrendered: 186
- Total: 586

Note: Of the 330 Current Deemed Permits 38 have been replaced by 21 Resource Consents but have not yet been surrendered. Therefore they maintain a status of current.

Since 1 January 2016 the Otago Regional Council has granted 34 Resource Consents to replace 82 Deemed Permit. 36 of these Deemed Permits have been surrendered. The terms for the Resource Consents replacing these Deemed Permits are:

- 3 have been granted for a term of six years or less.
- 5 have been granted for a term of more than six years and up to fifteen years
- 26 have been granted for a term of more than fifteen years.

A further 207 Deemed Permits currently have applications underway to replace them with 162 Resource Consents. The applicants have applied for:

- 18 consents with a term of six years or less.
- 2 consents with a term of more than six years, and up to fifteen years
- 123 consents with a term of more than fifteen years.
- 19 consents with no expiry date currently recorded in the Otago Regional Council's consent database

There are currently 85 Deemed Permits for which no application has been lodged. Those deemed permits include 0 Permits to take and use Groundwater, 12 Permits to Dam Water, and 0 Permits to discharge to water. In addition to these Deemed Permits a further 55 Resource Consents are due to expire between 27 September 2021 and 8 October 2021.

Please note that these numbers present a snapshot of the Otago Regional Council's Resource Consent database on the day that this report was produced. As such, any of these numbers may vary up or down as new applications are received or granted, Deemed Permits are cancelled or surrendered, or applicants are able to prove they can meet the provisions of section 413 of the Resource Management Act (1991).

A summary of deemed permit replacement process in each catchment with current deemed permits is presented below:

Catchment.	Deemed Permits Awaiting Application	Deemed Permit Applications in Progress
Albert Burn (1)	0	1
Amisfield Burn	1	2
Arrow River	1	
Bannock Burn	0	8
Basin Burn	0	4
Beaumont River	1	0

Deemed Permit Status

The Otago Regional Council's consent database currently contains data for 586 Deemed Permits. Their current status is:

- Cancelled: 23
- Current: 327
- Expired: 46
- In Progress: 1
- Surrendered: 189
- Total: 586

Note: Of the 327 Current Deemed Permits 38 have been replaced by 22 Resource Consents but have not yet been surrendered. Therefore they maintain a status of current.

Since 1 January 2016 the Otago Regional Council has granted 35 Resource Consents to replace 83 Deemed Permit. 37 of these Deemed Permits have been surrendered. The terms for the Resource Consents replacing these Deemed Permits are:

- 4 have been granted for a term of six years or less.
- 5 have been granted for a term of more than six years and up to fifteen years
- 26 have been granted for a term of more than fifteen years.

A further 206 Deemed Permits currently have applications underway to replace them with 161 Resource Consents. The applicants have applied for:

- 17 consents with a term of six years or less.
- 2 consents with a term of more than six years, and up to fifteen years
- 123 consents with a term of more than fifteen years.
- 19 consents with no expiry date currently recorded in the Otago Regional Council's consent database

There are currently 83 Deemed Permits for which no application has been lodged. Those deemed permits include 0 Permits to take and use Groundwater, 12 Permits to Dam Water, and 0 Permits to discharge to water. In addition to these Deemed Permits a further 53 Resource Consents are due to expire between 27 September 2021 and 8 October 2021.

Please note that these numbers present a snapshot of the Otago Regional Council's Resource Consent database on the day that this report was produced. As such, any of these numbers may vary up or down as new applications are received or granted, Deemed Permits are cancelled or surrendered, or applicants are able to prove they can meet the provisions of section 413 of the Resource Management Act (1991).

A summary of deemed permit replacement process in each catchment with current deemed permits is presented below:

Catchment.	Deemed Permits Awaiting Application	Deemed Permit Applications in Progress
Albert Burn (1)	0	1
Amisfield Burn	1	2
Arrow River	1	
Bannock Burn	0	8
Basin Burn	0	4
Beaumont River	1	0

Deemed Permit Status

The Otago Regional Council's consent database currently contains data for 586 Deemed Permits. Their current status is:

- Cancelled: 23
- Current: 327
- Expired: 46
- In Progress: 1
- Surrendered: 189
- Total: 586

Note: Of the 327 Current Deemed Permits 36 have been replaced by 20 Resource Consents but have not yet been surrendered. Therefore they maintain a status of current.

Since 1 January 2016 the Otago Regional Council has granted 36 Resource Consents to replace 84 Deemed Permit. 37 of these Deemed Permits have been surrendered. The terms for the Resource Consents replacing these Deemed Permits are:

- 5 have been granted for a term of six years or less.
- 5 have been granted for a term of more than six years and up to fifteen years
- 26 have been granted for a term of more than fifteen years.

A further 206 Deemed Permits currently have applications underway to replace them with 161 Resource Consents. The applicants have applied for:

- 17 consents with a term of six years or less.
- 2 consents with a term of more than six years, and up to fifteen years
- 123 consents with a term of more than fifteen years.
- 19 consents with no expiry date currently recorded in the Otago Regional Council's consent database

There are currently 85 Deemed Permits for which no application has been lodged. Those deemed permits include 0 Permits to take and use Groundwater, 12 Permits to Dam Water, and 0 Permits to discharge to water. In addition to these Deemed Permits a further 52 Resource Consents are due to expire between 27 September 2021 and 8 October 2021.

Please note that these numbers present a snapshot of the Otago Regional Council's Resource Consent database on the day that this report was produced. As such, any of these numbers may vary up or down as new applications are received or granted, Deemed Permits are cancelled or surrendered, or applicants are able to prove they can meet the provisions of section 413 of the Resource Management Act (1991).

A summary of deemed permit replacement process in each catchment with current deemed permits is presented below:

Deemed Permit Status

The Otago Regional Council's consent database currently contains data for 586 Deemed Permits. Their current status is:

- Cancelled: 23
- Current: 326
- Expired: 46
- In Progress: 1
- Surrendered: 190
- Total: 586

Note: Of the 326 Current Deemed Permits 36 have been replaced by 20 Resource Consents but have not yet been surrendered. Therefore they maintain a status of current.

Since 1 January 2016 the Otago Regional Council has granted 37 Resource Consents to replace 85 Deemed Permit. 37 of these Deemed Permits have been surrendered. The terms for the Resource Consents replacing these Deemed Permits are:

- 6 have been granted for a term of six years or less.
- 5 have been granted for a term of more than six years and up to fifteen years
- 26 have been granted for a term of more than fifteen years.

A further 205 Deemed Permits currently have applications underway to replace them with 160 Resource Consents. The applicants have applied for:

- 16 consents with a term of six years or less.
- 2 consents with a term of more than six years, and up to fifteen years
- 123 consents with a term of more than fifteen years.
- 19 consents with no expiry date currently recorded in the Otago Regional Council's consent database

There are currently 85 Deemed Permits for which no application has been lodged. Those deemed permits include 0 Permits to take and use Groundwater, 12 Permits to Dam Water, and 0 Permits to discharge to water. In addition to these Deemed Permits a further 52 Resource Consents are due to expire between 27 September 2021 and 8 October 2021.

Please note that these numbers present a snapshot of the Otago Regional Council's Resource Consent database on the day that this report was produced. As such, any of these numbers may vary up or down as new applications are received or granted, Deemed Permits are cancelled or surrendered, or applicants are able to prove they can meet the provisions of section 413 of the Resource Management Act (1991).

Deemed Permit Status

The Otago Regional Council's consent database currently contains data for 586 Deemed Permits. Their current status is:

- Cancelled: 23
- Current: 325
- Expired: 46
- In Progress: 1
- Surrendered: 191
- Total: 586

Note: Of the 325 Current Deemed Permits 36 have been replaced by 20 Resource Consents but have not yet been surrendered. Therefore they maintain a status of current.

Since 1 January 2016 the Otago Regional Council has granted 37 Resource Consents to replace 85 Deemed Permit. 37 of these Deemed Permits have been surrendered. The terms for the Resource Consents replacing these Deemed Permits are:

- 6 have been granted for a term of six years or less.
- 5 have been granted for a term of more than six years and up to fifteen years
- 26 have been granted for a term of more than fifteen years.

A further 205 Deemed Permits currently have applications underway to replace them with 160 Resource Consents. The applicants have applied for:

- 16 consents with a term of six years or less.
- 2 consents with a term of more than six years, and up to fifteen years
- 123 consents with a term of more than fifteen years.
- 19 consents with no expiry date currently recorded in the Otago Regional Council's consent database

There are currently 84 Deemed Permits for which no application has been lodged. Those deemed permits include 0 Permits to take and use Groundwater, 12 Permits to Dam Water, and 0 Permits to discharge to water. In addition to these Deemed Permits a further 53 Resource Consents are due to expire between 27 September 2021 and 8 October 2021.

Please note that these numbers present a snapshot of the Otago Regional Council's Resource Consent database on the day that this report was produced. As such, any of these numbers may vary up or down as new applications are received or granted, Deemed Permits are cancelled or surrendered, or applicants are able to prove they can meet the provisions of section 413 of the Resource Management Act (1991).

A summary of deemed permit replacement process in each catchment with current deemed permits is presented below:

Catchment.	Deemed Permits Awaiting Application	Deemed Permit Applications in Progress
Albert Burn (1)	0	1
Amisfield Burn	1	2
Arrow River	1	
Bannock Burn	0	8
Basin Burn	0	4
Beaumont River	1	0
Bendigo Creek	0	0
Benger Burn	0	0
Burn Cottage Creek	1	3
Butchers Creek (1)	2	0
Cambells Creek	1	0
Camp Creek (1)	0	2
Cardrona River	2	9
Chapmans Gully	1	0
Coal Creek	6	0
Crook Burn (2)	0	1
Donaldsons Creek	0	0
Elbow Creek	0	0
Five Mile Creek (1)	1	0
Franks Creek	1	1
Fraser River	3	2
Kidd Creek	1	0
Lindis River	2	9
Long Gully (1)	0	0
Long Gully (2)	0	0
Lowburn Creek	3	13
Luggate Catchment	0	0
Manuherikia Catchment	9	43
Nevis River	0	2
No Catchment Recorded	14	6
Park Burn	1	1
Pipeclay Gully	0	1
Poison Creek	0	0

Pomahaka River	0	1
Quartz Creek	0	0
Quartz Reef Creek	0	1
Queensberry Hills	0	0
Rees River	0	1
Ripponvale Road	0	0
Roaring Meg	1	1
Schoolhouse Creek	0	1
Shingle Creek	9	0
Shotover River	1	0
Taieri Catchment	8	31
Teviot River	2	0
Tinwald Burn	0	2
Toms Creek	1	1
Unnamed Trib's of Clutha River above Lake Dunstan	2	1
Unnamed Trib's of Clutha River above Lake Roxburgh	0	2
Unnamed Trib's of Clutha River above Tuapeka Mouth	7	0

Deemed Permit Status

The Otago Regional Council's consent database currently contains data for 586 Deemed Permits. Their current status is:

- Cancelled: 23
- Current: 325
- Expired: 46
- In Progress: 1
- Surrendered: 191
- Total: 586

Note: Of the 325 Current Deemed Permits 36 have been replaced by 20 Resource Consents but have not yet been surrendered. Therefore they maintain a status of current.

Since 1 January 2016 the Otago Regional Council has granted 37 Resource Consents to replace 85 Deemed Permit. 37 of these Deemed Permits have been surrendered. The terms for the Resource Consents replacing these Deemed Permits are:

- 6 have been granted for a term of six years or less.
- 5 have been granted for a term of more than six years and up to fifteen years
- 26 have been granted for a term of more than fifteen years.

A further 206 Deemed Permits currently have applications underway to replace them with 161 Resource Consents. The applicants have applied for:

- 16 consents with a term of six years or less.
- 2 consents with a term of more than six years, and up to fifteen years
- 123 consents with a term of more than fifteen years.
- 20 consents with no expiry date currently recorded in the Otago Regional Council's consent database

There are currently 83 Deemed Permits for which no application has been lodged. Those deemed permits include 0 Permits to take and use Groundwater, 12 Permits to Dam Water, and 0 Permits to discharge to water. In addition to these Deemed Permits a further 52 Resource Consents are due to expire between 27 September 2021 and 8 October 2021.

Please note that these numbers present a snapshot of the Otago Regional Council's Resource Consent database on the day that this report was produced. As such, any of these numbers may vary up or down as new applications are received or granted, Deemed Permits are cancelled or surrendered, or applicants are able to prove they can meet the provisions of section 413 of the Resource Management Act (1991).

A summary of deemed permit replacement process in each catchment with current deemed permits is presented below:

Catchment.	Deemed Permits Awaiting Application	Deemed Permit Applications in Progress
Albert Burn (1)	0	1
Amisfield Burn	1	2
Arrow River	1	
Bannock Burn	0	8
Basin Burn	0	4
Beaumont River	1	0
Bendigo Creek	0	0
Benger Burn	0	0
Burn Cottage Creek	1	3
Butchers Creek (1)	2	0
Cambells Creek	1	0
Camp Creek (1)	0	2
Cardrona River	2	9
Chapmans Gully	1	0
Coal Creek	6	0
Crook Burn (2)	0	1
Donaldsons Creek	0	0
Elbow Creek	0	0
Five Mile Creek (1)	1	0
Franks Creek	1	1
Fraser River	3	2
Kidd Creek	1	0
Lindis River	2	9
Long Gully (1)	0	0
Long Gully (2)	0	0
Lowburn Creek	3	13
Luggate Catchment	0	0
Manuherikia Catchment	9	43
Nevis River	0	2
No Catchment Recorded	14	6
Park Burn	1	1
Pipeclay Gully	0	1
Poison Creek	0	0

Pomahaka River	0	1
Quartz Creek	0	0
Quartz Reef Creek	0	1
Queensberry Hills	0	0
Rees River	0	1
Ripponvale Road	0	0
Roaring Meg	1	1
Schoolhouse Creek	0	1
Shingle Creek	9	0
Shotover River	1	0
Taieri Catchment	8	31
Teviot River	2	0
Tinwald Burn	0	2
Toms Creek	1	1
Unnamed Trib's of Clutha River above Lake Dunstan	2	1
Unnamed Trib's of Clutha River above Lake Roxburgh	0	2
Unnamed Trib's of Clutha River above Tuapeka Mouth	6	1
Unnamed Trib's of Kawarau River	0	2
Unnamed Trib's of Lake Hawea	1	0
Waikerikeri Creek	0	2
Waitahuna Catchment	1	0
Wanaka Township	0	3
Washpool Creek (1)	0	3

Deemed Permit Status

The Otago Regional Council's consent database currently contains data for 586 Deemed Permits. Their current status is:

- Cancelled: 23
- Current: 325
- Expired: 46
- In Progress: 1
- Surrendered: 191
- Total: 586

Note: Of the 325 Current Deemed Permits 37 have been replaced by 21 Resource Consents but have not yet been surrendered. Therefore they maintain a status of current.

Since 1 January 2016 the Otago Regional Council has granted 38 Resource Consents to replace 86 Deemed Permit. 37 of these Deemed Permits have been surrendered. The terms for the Resource Consents replacing these Deemed Permits are:

- 7 have been granted for a term of six years or less.
- 5 have been granted for a term of more than six years and up to fifteen years
- 26 have been granted for a term of more than fifteen years.

A further 206 Deemed Permits currently have applications underway to replace them with 160 Resource Consents. The applicants have applied for:

- 16 consents with a term of six years or less.
- 2 consents with a term of more than six years, and up to fifteen years
- 123 consents with a term of more than fifteen years.
- 19 consents with no expiry date currently recorded in the Otago Regional Council's consent database

There are currently 83 Deemed Permits for which no application has been lodged. Those deemed permits include 0 Permits to take and use Groundwater, 12 Permits to Dam Water, and 0 Permits to discharge to water. In addition to these Deemed Permits a further 52 Resource Consents are due to expire between 27 September 2021 and 8 October 2021.

Please note that these numbers present a snapshot of the Otago Regional Council's Resource Consent database on the day that this report was produced. As such, any of these numbers may vary up or down as new applications are received or granted, Deemed Permits are cancelled or surrendered, or applicants are able to prove they can meet the provisions of section 413 of the Resource Management Act (1991).

A summary of deemed permit replacement process in each catchment with current deemed permits is presented below:

Catchment.	Deemed Permits Awaiting Application	Deemed Permit Applications in Progress
Albert Burn (1)	0	1
Amisfield Burn	1	2
Arrow River	1	
Bannock Burn	0	8
Basin Burn	0	4
Beaumont River	1	0
Bendigo Creek	0	0
Benger Burn	0	0

MFE CYBER SECURITY WARNING

This email originated from outside our organisation. Please take extra care when clicking on any links or opening any attachments.

Hi,

Deemed permit reports are attached.

We have a hearing this week for deemed permits relating to the Pig Burn. This application has been in the system since before PC7 was notified

Thanks,

Jo

Joanna Gilroy
MANAGER CONSENTS

Deemed Permit Status

The Otago Regional Council's consent database currently contains data for 586 Deemed Permits. Their current status is:

- Cancelled: 23
- Current: 326
- Expired: 46
- Surrendered: 191
- Total: 586

Note: Of the 326 Current Deemed Permits 37 have been replaced by 21 Resource Consents but have not yet been surrendered. Therefore they maintain a status of current.

Since 1 January 2016 the Otago Regional Council has granted 38 Resource Consents to replace 86 Deemed Permit. 37 of these Deemed Permits have been surrendered. The terms for the Resource Consents replacing these Deemed Permits are:

- 7 have been granted for a term of six years or less.
- 5 have been granted for a term of more than six years, and up to fifteen years
- 26 have been granted for a term of more than fifteen years

A further 207 Deemed Permits currently have applications underway to replace them with 162 Resource Consents. The applicants have applied for:

- 16 consents with a term of six years or less.
- 2 consents with a term of more than six years, and up to fifteen years
- 123 consents with a term of more than fifteen years.
- 21 consents with no expiry date currently recorded in the Otago Regional Council's consent database

There are currently 83 Deemed Permits for which no application has been lodged. Those deemed permits include 0 Permits to take and use Groundwater, 12 Permits to Dam Water and 0 Permits to discharge to water. In addition to these Deemed Permits a further 52 Resource Consents are due to expire between 27 September 2021 and 8 October 2021.

Please note that these numbers present a snapshot of the Otago Regional Council's Resource Consent database on the day that this report was produced. As such, any of these numbers may vary up or down as new applications are received or granted, Deemed Permits are cancelled or surrendered, or applicants are able to prove they can meet the provisions of section 413 of the Resource Management Act (1991).

A summary of deemed permit replacement process in each catchment with current deemed permits is presented below:

Catchment.	Deemed Permits Awaiting Application	Deemed Permit Applications in Progress
Albert Burn (1)	0	1
Amisfield Burn	1	2
Arrow River	1	
Bannock Burn	0	8
Basin Burn	0	4
Beaumont River	1	0

Hi,

Yes, will do that from next week.

Thanks,

Joanna

Thanks Joanna

Quick Admin update, if you could please remove Ben Flighty from receiving these and add Macaela Flanagan and Alison Grayston that would be appreciated

Thanks
Shannon

Hi,

Deemed permit reports are attached.

We have a hearing this week for deemed permits relating to the Pig Burn. This application has been in the system since before PC7 was notified.

Thanks,

Jo

Joanna Gilroy

Hi,

Deemed permit reports are attached.

Other updates:

- We held a hearing last week for an application relating to deemed permits. This was an application from early 2020. I will send through the decision when released.
- Two applications relating to deemed permits came in last week and another one yesterday. This third one is not showing on the report yet as it has not been entered into the system.

Thanks,

Jo

Deemed Permit Status

The Otago Regional Council's consent database currently contains data for 586 Deemed Permits. Their current status is:

- Cancelled: 23
- Current: 326
- Expired: 46
- Surrendered: 191
- Total: 586

Note: Of the 326 Current Deemed Permits 37 have been replaced by 21 Resource Consents but have not yet been surrendered. Therefore they maintain a status of current.

Since 1 January 2016 the Otago Regional Council has granted 38 Resource Consents to replace 86 Deemed Permit. 37 of these Deemed Permits have been surrendered. The terms for the Resource Consents replacing these Deemed Permits are:

- 7 have been granted for a term of six years or less.
- 5 have been granted for a term of more than six years, and up to fifteen years
- 26 have been granted for a term of more than fifteen years

A further 209 Deemed Permits currently have applications underway to replace them with 164 Resource Consents. The applicants have applied for:

- 16 consents with a term of six years or less.
- 2 consents with a term of more than six years, and up to fifteen years
- 123 consents with a term of more than fifteen years.
- 23 consents with no expiry date currently recorded in the Otago Regional Council's consent database

There are currently 81 Deemed Permits for which no application has been lodged. Those deemed permits include 0 Permits to take and use Groundwater, 12 Permits to Dam Water and 0 Permits to discharge to water. In addition to these Deemed Permits a further 51 Resource Consents are due to expire between 27 September 2021 and 8 October 2021.

Please note that these numbers present a snapshot of the Otago Regional Council's Resource Consent database on the day that this report was produced. As such, any of these numbers may vary up or down as new applications are received or granted, Deemed Permits are cancelled or surrendered, or applicants are able to prove they can meet the provisions of section 413 of the Resource Management Act (1991).

A summary of deemed permit replacement process in each catchment with current deemed permits is presented below:

Hi,

Deemed permit report for 28 September is attached.

By way of an update, six applications relating to deemed permits have come in over the last two and a half weeks.

Thanks,

Jo

Joanna Gilroy

Deemed Permit Status

The Otago Regional Council's consent database currently contains data for 586 Deemed Permits. Their current status is:

- Cancelled: 23
- Current: 326
- Expired: 46
- Surrendered: 191
- Total: 586

Note: Of the 326 Current Deemed Permits 37 have been replaced by 21 Resource Consents but have not yet been surrendered. Therefore they maintain a status of current.

Since 1 January 2016 the Otago Regional Council has granted 39 Resource Consents to replace 87 Deemed Permit. 37 of these Deemed Permits have been surrendered. The terms for the Resource Consents replacing these Deemed Permits are:

- 8 have been granted for a term of six years or less.
- 5 have been granted for a term of more than six years, and up to fifteen years
- 26 have been granted for a term of more than fifteen years

A further 214 Deemed Permits currently have applications underway to replace them with 169 Resource Consents. The applicants have applied for:

- 16 consents with a term of six years or less.
- 2 consents with a term of more than six years, and up to fifteen years
- 123 consents with a term of more than fifteen years.
- 28 consents with no expiry date currently recorded in the Otago Regional Council's consent database

There are currently 76 Deemed Permits for which no application has been lodged. Those deemed permits include 0 Permits to take and use Groundwater, 11 Permits to Dam Water and 0 Permits to discharge to water. In addition to these Deemed Permits a further 52 Resource Consents are due to expire between 27 September 2021 and 8 October 2021.

Please note that these numbers present a snapshot of the Otago Regional Council's Resource Consent database on the day that this report was produced. As such, any of these numbers may vary up or down as new applications are received or granted, Deemed Permits are cancelled or surrendered, or applicants are able to prove they can meet the provisions of section 413 of the Resource Management Act (1991).

A summary of deemed permit replacement process in each catchment with current deemed permits is presented below:

Catchment.	Deemed Permits Awaiting Application	Deemed Permit Applications in Progress
Albert Burn (1)	0	1
Amisfield Burn	1	2
Arrow River	0	
Bannock Burn	0	8
Basin Burn	0	4

MFE CYBER SECURITY WARNING

This email originated from outside our organisation. Please take extra care when clicking on any links or opening any attachments.

Hi,

The deemed permit report for 5 October is attached.

We have tidied up the database as a result of the deemed permits expiring which has resulted in the number that have expired without an application coming in as being 45.

If you have any questions then please let me know

Kind regards,

Jo

Joanna Gilroy
MANAGER CONSENTS

Deemed Permit Status

The Otago Regional Council's consent database currently contains data for 587 Deemed Permits. Their current status is:

- Cancelled: 23
- Expired: 373
- Surrendered: 191
- Total: 587

Since 1 January 2016 the Otago Regional Council has granted 44 Resource Consents to replace 93 Deemed Permit. 37 of these Deemed Permits have been surrendered. The terms for the Resource Consents replacing these Deemed Permits are:

- 12 have been granted for a term of six years or less.
- 6 have been granted for a term of more than six years, and up to fifteen years
- 26 have been granted for a term of more than fifteen years.

A further 254 Deemed Permits currently have applications underway to replace them with 221 Resource Consents. The applicants have applied for:

- 29 consents with a term of six years or less.
- 3 consents with a term of more than six years, and up to fifteen years
- 133 consents with a term of more than fifteen years.
- 56 consents with no expiry date currently recorded in the Otago Regional Council's consent database

There are currently 45 Deemed Permits for which no application has been lodged. Those deemed permits include 0 Permits to take and use Groundwater, 9 Permits to Dam Water, and 0 Permits to discharge to water. In addition to these Deemed Permits a further 40 Resource Consents are due to expire between 27 September 2021 and 8 October 2021.

Please note that these numbers present a snapshot of the Otago Regional Council's Resource Consent database on the day that this report was produced. As such, any of these numbers may vary up or down as new applications are received or granted, Deemed Permits are cancelled or surrendered, or applicants are able to prove they can meet the provisions of section 413 of the Resource Management Act (1991).

A summary of deemed permit replacement process in each catchment with current deemed permits is presented below:

Catchment.	Deemed Permits Awaiting Application	Deemed Permit Applications in Progress
Albert Burn (1)	0	1
Amisfield Burn	1	2
Arrow River	0	
Bannock Burn	0	10
Basin Burn	0	4
Beaumont River	1	0

Hi,

Deemed permit report is attached for 12 October.

If you have any questions just let me know.

Thanks,

Jo

Joanna Gilroy

Deemed Permit Status

The Otago Regional Council's consent database currently contains data for 586 Deemed Permits. Their current status is:

- Cancelled: 23
- Expired: 371
- Expired – Pending Application: 1
- Surrendered: 191
- Total: 586

Since 1 January 2016 the Otago Regional Council has granted 45 Resource Consents to replace 94 Deemed Permit. 37 of these Deemed Permits have been surrendered. The terms for the Resource Consents replacing these Deemed Permits are:

- 12 have been granted for a term of six years or less.
- 7 have been granted for a term of more than six years, and up to fifteen years
- 26 have been granted for a term of more than fifteen years.

A further 282 Deemed Permits currently have applications underway to replace them with 235 Resource Consents. The applicants have applied for:

- 30 consents with a term of six years or less.
- 9 consents with a term of more than six years, and up to fifteen years
- 141 consents with a term of more than fifteen years.
- 55 consents with no expiry date currently recorded in the Otago Regional Council's consent database

There are currently 45 Deemed Permits for which no application has been lodged. These deemed permits include 0 Permits to take and use Groundwater, 9 Permits to Dam Water, and 0 Permits to discharge to water. In addition to these Deemed Permits a further 40 Resource Consents are due to expire between 27 September 2021 and 8 October 2021.

Please note that these numbers present a snapshot of the Otago Regional Council's Resource Consent database on the day that this report was produced. As such, any of these numbers may vary up or down as new applications are received or granted, Deemed Permits are cancelled or surrendered, or applicants are able to prove they can meet the provisions of section 413 of the Resource Management Act (1991).

A summary of deemed permit replacement process in each catchment with current deemed permits is presented below:

Catchment.	Deemed Permits Awaiting Application	Deemed Permit Applications in Progress

Deemed Permit Status

The Otago Regional Council's consent database currently contains data for 585 Deemed Permits. Their current status is:

- Cancelled: 23
- Expired: 215
- Expired – Pending Application: 156
- Surrendered: 191
- Total: 585

Since 1 January 2016 the Otago Regional Council has granted 46 Resource Consents to replace 94 Deemed Permit. 37 of these Deemed Permits have been surrendered. The terms for the Resource Consents replacing these Deemed Permits are:

- 13 have been granted for a term of six years or less.
- 7 have been granted for a term of more than six years, and up to fifteen years
- 26 have been granted for a term of more than fifteen years.

A further 291 Deemed Permits currently have applications underway to replace them with 242 Resource Consents. The applicants have applied for:

- 31 consents with a term of six years or less.
- 10 consents with a term of more than six years, and up to fifteen years
- 146 consents with a term of more than fifteen years.
- 55 consents with no expiry date currently recorded in the Otago Regional Council's consent database

There are currently 42 Deemed Permits for which no application has been lodged. These deemed permits include 0 Permits to take and use Groundwater, 8 Permits to Dam Water, and 0 Permits to discharge to water. In addition to these Deemed Permits a further 40 Resource Consents are due to expire between 27 September 2021 and 8 October 2021.

Please note that these numbers present a snapshot of the Otago Regional Council's Resource Consent database on the day that this report was produced. As such, any of these numbers may vary up or down as new applications are received or granted, Deemed Permits are cancelled or surrendered, or applicants are able to prove they can meet the provisions of section 413 of the Resource Management Act (1991).

A summary of deemed permit replacement process in each catchment with current deemed permits is presented below:

Catchment.	Deemed Permits Awaiting Application	Deemed Permit Applications in Progress

Deemed Permit Status

The Otago Regional Council's consent database currently contains data for 585 Deemed Permits. Their current status is:

- Cancelled: 23
- Expired: 158
- Expired – Pending Application: 213
- Surrendered: 191
- Total: 585

Since 1 January 2016 the Otago Regional Council has granted 47 Resource Consents to replace 94 Deemed Permit. 37 of these Deemed Permits have been surrendered. The terms for the Resource Consents replacing these Deemed Permits are:

- 15 have been granted for a term of six years or less.
- 7 have been granted for a term of more than six years, and up to fifteen years
- 25 have been granted for a term of more than fifteen years.

A further 292 Deemed Permits currently have applications underway to replace them with 244 Resource Consents. The applicants have applied for:

- 32 consents with a term of six years or less.
- 10 consents with a term of more than six years, and up to fifteen years
- 146 consents with a term of more than fifteen years.
- 56 consents with no expiry date currently recorded in the Otago Regional Council's consent database

There are currently 41 Deemed Permits for which no application has been lodged. These deemed permits include 0 Permits to take and use Groundwater, 8 Permits to Dam Water, and 0 Permits to discharge to water. In addition to these Deemed Permits a further 41 Resource Consents are due to expire between 27 September 2021 and 8 October 2021.

Please note that these numbers present a snapshot of the Otago Regional Council's Resource Consent database on the day that this report was produced. As such, any of these numbers may vary up or down as new applications are received or granted, Deemed Permits are cancelled or surrendered, or applicants are able to prove they can meet the provisions of section 413 of the Resource Management Act (1991).

Deemed Permit Status

The Otago Regional Council's consent database currently contains data for 585 Deemed Permits. Their current status is:

- Cancelled: 23
- Expired: 159
- Expired – Pending Application: 212
- Surrendered: 191
- Total: 585

Since 1 January 2016 the Otago Regional Council has granted 47 Resource Consents to replace 94 Deemed Permit. 37 of these Deemed Permits have been surrendered. The terms for the Resource Consents replacing these Deemed Permits are:

- 15 have been granted for a term of six years or less.
- 7 have been granted for a term of more than six years, and up to fifteen years
- 25 have been granted for a term of more than fifteen years.

A further 292 Deemed Permits currently have applications underway to replace them with 244 Resource Consents. The applicants have applied for:

- 32 consents with a term of six years or less.
- 10 consents with a term of more than six years, and up to fifteen years
- 146 consents with a term of more than fifteen years.
- 56 consents with no expiry date currently recorded in the Otago Regional Council's consent database

There are currently 41 Deemed Permits for which no application has been lodged. These deemed permits include 0 Permits to take and use Groundwater, 8 Permits to Dam Water, and 0 Permits to discharge to water. In addition to these Deemed Permits a further 40 Resource Consents are due to expire between 27 September 2021 and 8 October 2021.

Please note that these numbers present a snapshot of the Otago Regional Council's Resource Consent database on the day that this report was produced. As such, any of these numbers may vary up or down as new applications are received or granted, Deemed Permits are cancelled or surrendered, or applicants are able to prove they can meet the provisions of section 413 of the Resource Management Act (1991).

A summary of deemed permit replacement process in each catchment with current deemed permits is presented below:

This email originated from outside our organisation. Please take extra care when clicking on any links or opening any attachments.

Hi Shannon,

Now that the deemed permit applications are in and the others have expired, could you please let me know what reporting the Ministry/Minister would like on the deemed permits. The report in its current format needs to be updated slightly, but I did not want to ask the team to do that if there were other changes needed.

Also we are still happy to meet as indicated a couple of weeks ago – just let me know if you would still like to do this.

Thanks,

Jo

MFE CYBER SECURITY WARNING

This email originated from outside our organisation. Please take extra care when clicking on any links or opening any attachments.

Hi

Thanks for your time yesterday. Below is an explanation of what we have been working on and the plan moving forward. This is what I covered in the meeting yesterday.

- We have prepared an amendment form for applicants and consultants to use. This is attached. Draft versions of this were sent to the consultants and core stakeholder groups we regularly work with for their input.
- We have prepared a couple of new practice notes on PC7 and related practice matters. These are attached.
- We have 111 applications in the system that are impacted by the decision (note this is not the number of consents but I am looking at application numbers to manage workflow)
- We are responding to questions from consultants as they come up and may look to circulate a set of FAQs or do more practice notes. We are also meeting with consultants to run through their applications where they have asked for this to happen.
- The majority of applications lodged with Council are on timeframe extensions.
- We are staging the process of the applications. This recognises the time required by applicants and consultants in preparing amendments (where required) and all takes to consideration and the now impending Christmas/New Year period. We have sought feedback from the primary consultants who have lodged applications with us on the practicality of the below and there is general agreement. We will look to progress applications as quickly as possible in advance of these time periods and if there is a need expressed from an applicant we will progress ones faster than the indicated time period. The plan

Category/catchment grouping	Amendments to be lodged by (if required)	Time extension until	Schedule 10A.4 analysis to be completed by (this is still to be confirmed with the Data Team)	Approx # of applications (may be multiple consents in each application)
6 yr applications as lodged	26 November 2021	3 December 2021	12 November 2021	9
Miscellaneous – longer term applications as lodged	26 November 2021	3 December 2021	19 November 2021	3
Manuharekia	17 December 2021	17 December 2021	10 December 2021	27
Fraser	17 December 2021	17 December 2021	10 December 2021	6
Cardrona	17 December 2021	17 December 2021	10 December 2021	19
Taieri	10 January 2022	17 January 2022	17 December 2021	5
Arrow	24 January 2022	31 January 2022	27 January 2022	11
Owburn	31 January 2022	7 February 2022	2 January 2022	4
Trustpower	31 January 2022	7 February 2022	24 January 2022	

In terms of future reporting the proposal was

- Monthly updates with the first in December
- Reporting on the progress of the applications in the system that relate to deemed permission numbers still in progress and the number approved.
- Qualitative update on any issues or themes

If you want any other information or updates then please let me know.

Kind regards

Jo

Practice Note: Plan Change 7 Decision and Processing of Applications

The following advice note outlines how the Environment Court's decision on Plan Change 7 to the Regional Plan: Water for Otago (PC 7) relates to the processing of applications already lodged with Otago Regional Council. The advice considers how and when the activity status of the application may change, when Council can consider provisions precluding notification and how other applications associated with a water permit replacement application may be processed.

Activity status

What is the activity status?

The activity status of an application is crystallised at the date of lodgement. It is based on the activity proposed and applicable planning provisions (rules) at lodgement date. The activity status can be controlled, restricted discretionary, discretionary or non-complying¹.

For applications lodged prior to 18 March 2020, the activity status is as provided by the operative Regional Plan Water (oRPW) rules, although the objectives and policies of both the oRPW and PC 7 are relevant when considering the application.²

For applications lodged from 18 March 2020 until the decision on PC 7 (once PC 7 is amended by the Council as directed by the Court) both the operative RPW and PC 7 (notified version) rules apply and the relevant activity status is the most restrictive activity status, in accordance with the usual principles of bundling applications.

For applications lodged once the rules in PC 7 are beyond legal challenge or when PC 7 is operative, only the rules in PC 7 apply.

Can the activity status change?

It is possible for the activity status of some applications to change following a final decision on PC 7. The activity status that applies depends on when the application was lodged and/or the nature of the changes to the rules and corresponding activity status. The following table outlines which activity status applies at particular points in time:

¹ Permitted activities do not require consent and consent cannot be applied for prohibited activities. S87A and s104A-s104D of the RMA outline the key differences of each activity status.

² Consent is also required under the PC 7 rules, as these have legal effect on notification, but the application will be assessed under the activity status of the RPW rules rather than those in PC 7.

Application	Activity Status at lodgement	Activity Status after PC 7 decision ³
Existing applications lodged prior to the notification of PC 7 (before 18 March 2020)	Based on oRPW rules only	No change to activity status. Based on oRPW rules only
Existing applications lodged after notification of PC 7 and before PC 7 decision (between 18 March 2020 and the date that PC7 is amended under clause 16(1) ⁴)	Based on oRPW rules and PC 7 (notified) rules. The most restrictive activity status applies	Based on oRPW and PC7. The relevant version of PC 7 for the purposes of determining activity status is as below: 1. If PC 7 decision rules for the activity as lodged are more lenient than the rules in the PC 7 notified version, then the decisions version will apply 2. If PC 7 decision rules for the activity as lodged are more stringent than the rules in the PC 7 notified version the rules in the notified version will apply⁵ 3. If PC 7 decision rules and PC 7 notified rules remain the same, there is no change to activity status but any changes to the matters of control/discretion are relevant for notification/s104 decision making.
Applications lodged after PC 7 decision once it has been amended under clause 16(1) and before rules are beyond legal challenge	Based on rules in oRPW and decisions version of PC 7	Not applicable

³ Once amended by Council pursuant to clause 16(1) of Schedule 1

⁴ Date that PC 7 amended by Council pursuant to clause 16(1) of Schedule 1

⁵ Changes to the rule itself (including any matters of control/discretion) will be relevant for notification and s104 decision-making purposes.

The current activity status of an application lodged before a decision on PC7 is likely to be restricted discretionary, discretionary or non-complying. The job manager can provide you with advice on what the current activity status of your application is.

What happens when the PC 7 rules are beyond challenge?

The rules are beyond challenge if there are no appeals lodged on the rule in the PC 7 decision after 15 working days or, if there is an appeal to the High Court, once all appeals relating to a rule have been determined or all appeals have been withdrawn or dismissed. Once the rules are beyond challenge, they are treated as operative in accordance with section 86F RMA and any corresponding rules in the oRPW are treated as inoperative.

The following table explains what happens for existing applications and new applications once the rules are beyond challenge but before PC 7 is made operative.

	Activity Status at lodgement	Activity Status after rules are beyond challenge ⁶
Existing applications	See above table – depends on when the application was lodged	Although the activity status at the time the application was lodged may be crystallised if the activity status was more lenient, the new PC 7 rules will apply (to the take and use) and the oRPW rules fall away. Consent will only be required under the PC 7 rules. If the new PC7 rule is more enabling (has a more lenient activity status) than the previous relevant PC 7 or RPW rule, the applicant can benefit from the new rule and more lenient activity status. If the new PC 7 is more stringent than the previous relevant PC 7 or RPW rule the application should be decided based on the original activity status (at lodgement).
New applications	Activity status determined by new PC 7 rule only	N/A

For all of the applications above, although only the PC 7 rules are considered for water permits to take and use water, the objectives and policies of the oRPW and PC 7 will need to be considered when making a decision on the application until PC 7 is made operative by the Council.

⁶ Treated as operative under 86F of the RMA

What happens once PC 7 is made operative?

PC 7 will no longer be a 'proposed plan' once it is made operative by the Council. PC 7 will then be part of the RPW (as Chapter 10A).

The activity status of an application (existing or new) will solely be decided by the rules in Chapter 10A.

What if I amend my application to align with the rules in the PC 7 decision before the rules are beyond challenge?

If an amendment is lodged to align an application with the controlled activity or restricted discretionary activity rules in PC 7 (decisions version), the Council will still have to consider the operative RPW rules when assessing the application and the most restrictive rule applies.

Example: If an application is currently non-complying overall but is amended to meet the controlled activity rule in PC 7 (decisions version) it may have an overall activity status of discretionary or restricted discretionary activity depending on the rule in the operative RPW that applies to the activity.

Advice on making an amendment to the application is provided below.

What if I amend my application to align with the rules in the PC 7 decision once the PC 7 rules are beyond challenge?

Once the rules in PC 7 are beyond challenge and/or operative then we no longer need to consider the rules in the operative RPW. Council can process the application under the PC 7 rules only (although we can have regard to the activity status of the application at the time it was lodged if it was more lenient).

If PC 7 was not made operative (but the rules were beyond challenge and therefore treated as operative) when Council makes its decision on the application, the Council would need to consider and weigh the operative RPW objectives and policies (alongside the objectives and policies of PC 7) when making its decision. However, they may be given limited weight.

Example: If an application is currently non-complying overall but is amended to meet the controlled activity rule in PC 7 (beyond challenge version) it would be processed as a controlled activity. Until PC 7 is made operative, the relevant objectives and policies of the operative RPW would need to be considered when deciding the application.

Notification decision

Will there be preclusion of limited notification/public notification of my application?

PC 7 controlled and restricted discretionary rules (PC 7 decisions version) have a preclusion on limited notification and public notification. This means that there will be no ability to limited or publicly notify the application if the activity meets the controlled or restricted discretionary rules in PC 7.

However, this preclusion only applies once the rules are beyond challenge. If we process the application before this, we will still need to make a determination on public notification and limited notification in accordance with s95 of the RMA and any direction of the rules in the operative RPW that relate to your activity.

What if my deemed/water permit application has been lodged with other applications (e.g. damming of water, diversion of water)?

Where there is a notification preclusion on the controlled/restricted discretionary activity to take and use water, the aspects of the proposal not relating to the controlled/restricted discretionary activity are able to be considered for notification purposes (e.g. if the damming is a restricted discretionary activity under the oRPW with no preclusion on limited/public notification the preclusion does not apply to this part of the proposal).

However, this depends on whether or not the applications are processed as a bundle. The Council needs to consider if it processes the applications as a bundle, as in some cases the effects of the activities may not overlap. In those circumstances, the Council may proceed with a 'hybrid' activity status – see the section below on bundled applications. This will be assessed on a case-by-case basis.

What if a notification decision has already been made on my application?

If a notification decision has already been made on an application, the notification decision stands (except in very limited circumstances). This means that if your application has been publicly notified or limited notified, any submissions are still valid (despite a notification preclusion later coming into effect). Depending on the nature of the submissions (i.e. if submitters wish to be heard), a hearing will need to be held and a decision made by a delegated decision maker.

There is the opportunity for a submitter to withdraw their submission or seek not to be heard prior to a hearing. Some submitters may consider this if an application is amended to meet the controlled/restricted discretionary rules of PC 7.

Although the notification decision stands, the s104 substantive decision on the application will consider the amended activity status and the direction of the policies and objectives of PC 7 as the discretion of the decision maker will be restricted to the relevant matters of control or discretion.

Multiple activities and the operative RPW

For some applications, multiple activities have been applied for. These additional activities may enable the water take or support the water take activity. Examples of such other applications include instream or offline damming, retakes of water from reservoirs and water races, diversion of water, discharge of water/contaminants, activities in/near natural inland wetlands and/or the placement of weirs, culverts and passive flap gates.

If additional activities form part of the application and require consent only under the operative RPW or other legislation (e.g. National Environmental Standard for Freshwater Management) then this may affect the overall activity status of the application due to bundling principles.

The bundling principles apply where the activities for consents being sought overlap and are intrinsically linked with one another such that they cannot be realistically or properly separated and should be assessed together as a whole. In that case, the most restrictive activity status will apply to the application and any preclusions on limited notification only apply if the preclusion relates to all the activities that consent is required for. Applications generally should be bundled so that the effects of the proposal can be considered holistically, except for some limited circumstances.

While the RMA does not require the bundling of applications, the concept of bundling is well-established by case law, such that there are only limited circumstances in which not bundling the applications is considered acceptable. Case law indicates that this is when:

- (a) one of the consents sought is a controlled or restricted discretionary activity;
- (b) the scope of the Council's control or discretion in respect of one of the consents is relatively confined; and
- (c) the effects of exercising the two consents would not overlap, impact or have flow-on effects on each other.

This may be relevant for some applications.

Can I unbundle my water permit application under PC 7 from my other consent applications?

If you seek to have the water take and use unbundled and processed separately from other parts of the application, you will need to state this and include supporting documentation/assessment with the application (addressing the above factors). However, it is for the Council to determine whether bundling is required in each circumstance.

Example: Where one application is for a controlled activity, recent Environment Court authority suggests that it may be more appropriate for the effects of the activity to be considered together, but statutory limits must be observed (i.e. a controlled activity must be granted). Nonetheless, if controlled activities require additional consents to be

granted, then the controlled aspect could be granted while other consents are declined, and the overall proposal is still unable to be implemented.

How will PC 7 be considered if I do not unbundle my applications?

Each individual activity will be assessed in accordance with the objectives and policies of the relevant planning document and relevant higher order documents. PC 7 is likely to only be a relevant consideration for the water permit to take and use.

Example: A damming permit forms part of the proposal and consent for the damming is only required under the RPW. Will Council consider or assess any of PC7 provisions in relation to the damming activity given the wording of PC7 (being a standalone section of the RPW)?

Using the above as an example, although PC7 contains standalone provisions specific to replacement permits to take and use surface water, it is still part of the RPW, which is the relevant planning document for both applications (in accordance with section 104). In some cases, the wording of the policy in question will determine which application / aspect of the activity it is primarily relevant to. The provisions of PC7 limit the policies' application to applications to take and / or use freshwater. For the other activities (e.g. damming that is not the replacement of a deemed permit) the Council will assess the specific objectives and policies relevant to that aspect of the proposal. This may mean that the PC7 policies are only relevant to applications to take and / or use freshwater, or replace deemed permits, and that other aspects of the proposal as a whole will assess the relevant RPW provisions. It is noted that as Policy 10A.2.1 and Policy 10A.2.3 applies to all replacements of deemed permits, any damming permit that is sought as a replacement of a deemed permit (for example) will need to address and consider Policy 10A.2.1 and Policy 10A.2.3.

It is appropriate to limit the consideration of policies for the controlled aspect of the activity to those that are relevant to the matters of control, as even if the other policies are considered there is no ability to decline the consent to that aspect of the proposal as a result.

Amendments to applications

We have advice on amendments to applications available in a separate practice note, which is available on our website [practice-note-amendments-to-applications.pdf \(orc.govt.nz\)](https://orc.govt.nz/practice-note-amendments-to-applications.pdf)

An amendment to a consent application can be made at any point prior to the decision being made by the consent authority. However, an amendment must be within the scope of the original application, as defined by the original application. An amendment would be considered to go beyond the scope of the original application if it is significantly different in terms of the scale or intensity of the proposed activity, or the altered character or effects/impacts of the proposal. This will be determined on a case-by-case basis.

How do I consider my other activities/applications when I am preparing my Amendment documentation?

When you are completing the amendment form you will need to consider whether you are seeking any changes to any activities that require consent under our other plans and other parts of the oRPW and let us know if you are making changes to those parts of your application, including why the changes are in scope of the original application lodged.

Will you 're-make' a notification decision on an application?

Amendments to an application can be made before or after the application has been notified, and an amendment to an application could result in additional persons being required to be notified. However, once a notification decision has been made, the Council is functus officio. This means that once a notification decision has been made, the duty of the decision-maker has been discharged and the ability to vary the decision is lost. While there are some statutory exceptions, these are generally restricted to the correction of errors. This means that once a notification decision has been made, it is generally not able to be reconsidered by the Council.

Example: if the Council has made a notification decision on an application and following notification the applicant amends the application (e.g. amends the consent duration sought), the Council cannot re-make its notification decision on the amended application. If the applicant wanted the Council to remake its notification decision, it would need to lodge a fresh application. This means that persons notified of a resource consent application are unable to be "un-notified".

The above applies despite any notification preclusions that could apply in the event that the activity is amended to fall under a different rule / activity status, as the right to participation has already been granted and cannot be taken away by the Council.

Practice Note for Applicants: How PC7 applies to your application

How PC7 applies to your application depends on:

- the nature of the application lodged;
- PC 7 rules that applied at lodgement; and
- whether other activities have been applied for in addition to a consent to take and use water.

The objective, policies and rules of PC 7 can be found here: [Decision No \(environmentcourt.govt.nz\)](https://www.decision.no/environmentcourt.govt.nz).

If you are applying for a new take PC7 rules do not apply. You will need to look at the rules in Chapter 12 of the Regional Plan: Water for Otago.

Options for consents to take and use water under PC7

If you are replacing a deemed permit or a water permit that expires before 31 December 2025, PC7 (Chapter 10A) rules apply

There are generally three pathways for consenting under PC 7: controlled activity (must be granted), restricted discretionary activity and non complying activity¹.

1. A **controlled activity** must be granted, but conditions may be applied. This is available if:
 - you are not seeking consent for more than 6 years AND
 - you have good water metering data AND
 - you are not seeking more water than the rate or volume of take recorded by the water meter before 30 June 2020 AND
 - any existing limitations on the take (i.e. residual flow, minimum flow, or take cessation conditions, or rights of priority on a deemed permit) are to be carried into the replacement consent AND
 - you are not increasing the area of irrigation beyond the maximum area irrigated between 1 September 2017 and 18 March 2020.

If the take is for an orchard or vineyard, an additional area of irrigation can be included if the mainline irrigation pipes for that area were installed before 18 March 2020.

If your lodged application does not meet these entry criteria you can seek to amend your application to gain the benefits of being considered under this rule.

Note, if you are replacing a deemed permit for damming some of the entry criteria (irrigated land area, rates and volumes recorded by a meter) will not apply and those entry criteria are deemed to be met.

2. The **restricted discretionary activity** rule (historic use) provides for those applications that generally meet the controlled activity requirements but cannot meet the requirements about recorded rate and volume of take because of limited water

¹ There is a fourth pathway (restricted discretionary) but this only relates to specific Trustpower applications associated with the Waipori Hydro-electricity Scheme.

measuring data, and for community water supplies where there is a need to increase the take (within the limits of the existing permit) to provide for population growth within a six year consent term.

Note: The controlled activity and restricted discretionary activity rule (historic use) both have a preclusion on limited notification and public notification. This means that once the rules are beyond challenge there will be no affected parties to your take and use application².

3. If you choose not to amend your application to meet the requirements for either of the controlled activity or restricted discretionary options above, your application will be considered under the non-complying pathway.³

However, the direction of the PC7 decision is that this is for exceptional circumstances. We can advise that this processing pathway is likely to be time consuming and costly with no certainty on a decision to grant. If you are seeking to proceed with a non-complying activity we advise that you speak with us.

Things to think about when deciding whether to amend your application

In deciding whether to amend your application and what to amend within your application, the amendment form can be used as guidance. In addition, you will need to think about the following:

- The controlled and restricted discretionary rules are for consent terms of no greater than 6 years. Did you apply for a consent term greater than 6 years?
- What was the maximum area of land irrigated between 1 September 2017 and 18 March 2020 that the water permit you have sought to replace irrigated? What evidence do you have to support this? Did you apply for an increase in the area of land to be irrigated?
- If you are seeking to provide for new areas of irrigation for viticulture or orchards, and mainline irrigation pipes for these areas were installed prior to 18 March 2020, what evidence do you have of this? What size is this additional area? What are the best management practices you follow/propose to follow to minimise water quality effects?
- What is the rate of take and monthly and seasonal volumes you have applied for? Is this less than or more than water meter records show you have taken prior to 30 June 2020? (The controlled activity rule requires the rates and volumes to be equal to or less than that calculated using the Schedule 10A.4 methodology. We will send you a copy of your Schedule 10A.4 data results as they become available from our Data Team)
- If your take is for less than 5 litres per second or is a non-consumptive take, are the rates and volumes sought no more than the current consented rates and volumes?
- If you wish to use water measuring data beyond 30 June 2020 or have insufficient water metering data, what other methods and data have you included or do you need to accurately represent historic water use? Are the rates and volumes sought no more than existing permit conditions?

² If your application includes consents for other activities, then we may still need to consider if there are any affected parties for those parts.

- Does the permit you are replacing have any residual flow conditions, minimum flow conditions or any other conditions that restrict when and how much water can be taken? Does your application seek to include these on the new consent?
- Are you replacing a deemed permit? If yes, does your current deemed permit have any priorities listed on it? If yes, are you the first priority or a lesser priority? What deemed permits have priority over your take?
- Are you a community water supply? Is there a need to provide for population growth? How will population growth for the term of the consent be determined? How will water requirements for the population growth be determined?
- Have you proposed environmental mitigation measures in your application (e.g. new residual flows, fish screens, flow sharing)? Do you propose to remove any of these mitigation measures from the application? How much will that change the application as lodged?
- Does the application include activities other than taking and use water (e.g. damming, discharges, diversions, instream works)? If yes, do you seek to amend any part of those applications (e.g. reduce the consent term)?

Frequently asked questions

What about processing costs?

We are committed to keeping you up to date with processing costs and we will provide you with a new cost indication once we have heard from you about what you are doing with your application. Information on how we set our fees and how we charge for our time can be found at the below link. If at any time you are concerned about our processing costs, please get in touch with the processing officer.

<https://www.orc.govt.nz/consents-and-compliance/ready-to-apply-for-a-consent/fees-and-charges/fees-and-charges-faqs>

What if a notification decision has already been made?

If we have already asked you to go and get written approvals, or we have notified parties of your application then the options for your application will be slightly different. You can still make changes to the application to bring it into line with the matters in PC7, but it may still mean that you need to talk to the parties we have let you know about. There are not many applications in this situation- if you are unsure, just contact the processing officer for your application.

What if I have gaps in my data record from meter malfunction?

The RDA rule 10A.3.1.A.1 enables additional data to be considered to assess historic use. The application will need to be supported by other means of determining what the historical use is likely to have been for the gap in the data. This may include, but is not limited to, extrapolation of electricity records, use of Aqualinc ([aqualinc-irrigation-guidelines-2015.pdf \(orc.govt.nz\)](#)). It is likely that a combination of methods will be required to support an application. The application will need to clearly outline how the data and methods will reflect historic use.

What if my water measuring device only has 2-3 years of good data and I would like to use data from the 2020/2021 seasons?

The RDA rule 10A.3.1.A.1 enables data from additional seasons to be considered. If you are seeking to have data from additional years considered, this will need to be stated. The application will need to provide justification and reasoning for any additional season of data being included.

I have existing legal agreements that have managed the deemed permit priorities to date between water users in my catchment. Do I have to meet (viii) of controlled activity 10A.3.1.1?

The entry condition (viii) relating to Upstream Deemed Permits where there are Downstream Permits with a Higher Right of Priority requires a specific condition to be included as part of the application. In order to be considered a controlled activity, the application needs to include this condition and it will be imposed on the replacement consent. There is no requirement for a Downstream Permit Holder with a Higher Right of Priority to require the ceasing of water on the replacement consents have been granted. Existing legal agreements may need to be modified to reflect the changed wording on the granted consents to ensure that water taking behaviours at low flows continue as currently.

What if I have other questions?

If you are unsure about the next steps available to you, would like clarification on the above or have any additional questions please get in touch with your processing officer and/or submit questions to deemed.permits@orc.govt.nz.

Practice Note: Plan Change 7 Decision and Processing of Applications

The following advice note outlines how the Environment Court's decision on Plan Change 7 to the Regional Plan: Water for Otago (PC 7) relates to the processing of applications already lodged with Otago Regional Council. The advice considers how and when the activity status of the application may change, when Council can consider provisions precluding notification and how other applications associated with a water permit replacement application may be processed.

Activity status

What is the activity status?

The activity status of an application is crystallised at the date of lodgement. It is based on the activity proposed and applicable planning provisions (rules) at lodgement date. The activity status can be controlled, restricted discretionary, discretionary or non-complying¹.

For applications lodged prior to 18 March 2020, the activity status is as provided by the operative Regional Plan Water (oRPW) rules, although the objectives and policies of both the oRPW and PC 7 are relevant when considering the application.²

For applications lodged from 18 March 2020 until the decision on PC 7 (once PC 7 is amended by the Council as directed by the Court) both the operative RPW and PC 7 (notified version) rules apply and the relevant activity status is the most restrictive activity status, in accordance with the usual principles of bundling applications.

For applications lodged once the rules in PC 7 are beyond legal challenge or when PC 7 is operative, only the rules in PC 7 apply.

Can the activity status change?

It is possible for the activity status of some applications to change following a final decision on PC 7. The activity status that applies depends on when the application was lodged and/or the nature of the changes to the rules and corresponding activity status. The following table outlines which activity status applies at particular points in time:

¹ Permitted activities do not require consent and consent cannot be applied for prohibited activities. S87A and s104A-s104D of the RMA outline the key differences of each activity status.

² Consent is also required under the PC 7 rules, as these have legal effect on notification, but the application will be assessed under the activity status of the RPW rules rather than those in PC 7.

Application	Activity Status at lodgement	Activity Status after PC 7 decision ³
Existing applications lodged prior to the notification of PC 7 (before 18 March 2020)	Based on oRPW rules only	No change to activity status. Based on oRPW rules only
Existing applications lodged after notification of PC 7 and before PC 7 decision (between 18 March 2020 and the date that PC7 is amended under clause 16(1) ⁴)	Based on oRPW rules and PC 7 (notified) rules. The most restrictive activity status applies	Based on oRPW and PC7. The relevant version of PC 7 for the purposes of determining activity status is as below: 1. If PC 7 decision rules for the activity as lodged are more lenient than the rules in the PC 7 notified version, then the decisions version will apply 2. If PC 7 decision rules for the activity as lodged are more stringent than the rules in the PC 7 notified version the rules in the notified version will apply⁵ 3. If PC 7 decision rules and PC 7 notified rules remain the same, there is no change to activity status but any changes to the matters of control/discretion are relevant for notification/s104 decision making.
Applications lodged after PC 7 decision once it has been amended under clause 16(1) and before rules are beyond legal challenge	Based on rules in oRPW and decisions version of PC 7	Not applicable

³ Once amended by Council pursuant to clause 16(1) of Schedule 1

⁴ Date that PC 7 amended by Council pursuant to clause 16(1) of Schedule 1

⁵ Changes to the rule itself (including any matters of control/discretion) will be relevant for notification and s104 decision-making purposes.

The current activity status of an application lodged before a decision on PC7 is likely to be restricted discretionary, discretionary or non-complying. The job manager can provide you with advice on what the current activity status of your application is.

What happens when the PC 7 rules are beyond challenge?

The rules are beyond challenge if there are no appeals lodged on the rule in the PC 7 decision after 15 working days or, if there is an appeal to the High Court, once all appeals relating to a rule have been determined or all appeals have been withdrawn or dismissed. Once the rules are beyond challenge, they are treated as operative in accordance with section 86F RMA and any corresponding rules in the oRPW are treated as inoperative.

The following table explains what happens for existing applications and new applications once the rules are beyond challenge but before PC 7 is made operative.

	Activity Status at lodgement	Activity Status after rules are beyond challenge ⁶
Existing applications	See above table – depends on when the application was lodged	Although the activity status at the time the application was lodged may be crystallised if the activity status was more lenient, the new PC 7 rules will apply (to the take and use) and the oRPW rules fall away. Consent will only be required under the PC 7 rules. If the new PC7 rule is more enabling (has a more lenient activity status) than the previous relevant PC 7 or RPW rule, the applicant can benefit from the new rule and more lenient activity status. If the new PC 7 is more stringent than the previous relevant PC 7 or RPW rule the application should be decided based on the original activity status (at lodgement).
New applications	Activity status determined by new PC 7 rule only	N/A

For all of the applications above, although only the PC 7 rules are considered for water permits to take and use water, the objectives and policies of the oRPW and PC 7 will need to be considered when making a decision on the application until PC 7 is made operative by the Council.

⁶ Treated as operative under 86F of the RMA

What happens once PC 7 is made operative?

PC 7 will no longer be a 'proposed plan' once it is made operative by the Council. PC 7 will then be part of the RPW (as Chapter 10A).

The activity status of an application (existing or new) will solely be decided by the rules in Chapter 10A.

What if I amend my application to align with the rules in the PC 7 decision before the rules are beyond challenge?

If an amendment is lodged to align an application with the controlled activity or restricted discretionary activity rules in PC 7 (decisions version), the Council will still have to consider the operative RPW rules when assessing the application and the most restrictive rule applies.

Example: If an application is currently non-complying overall but is amended to meet the controlled activity rule in PC 7 (decisions version) it may have an overall activity status of discretionary or restricted discretionary activity depending on the rule in the operative RPW that applies to the activity.

Advice on making an amendment to the application is provided below.

What if I amend my application to align with the rules in the PC 7 decision once the PC 7 rules are beyond challenge?

Once the rules in PC 7 are beyond challenge and/or operative then we no longer need to consider the rules in the operative RPW. Council can process the application under the PC 7 rules only (although we can have regard to the activity status of the application at the time it was lodged if it was more lenient).

If PC 7 was not made operative (but the rules were beyond challenge and therefore treated as operative) when Council makes its decision on the application, the Council would need to consider and weigh the operative RPW objectives and policies (alongside the objectives and policies of PC 7) when making its decision. However, they may be given limited weight.

Example: If an application is currently non-complying overall but is amended to meet the controlled activity rule in PC 7 (beyond challenge version) it would be processed as a controlled activity. Until PC 7 is made operative, the relevant objectives and policies of the operative RPW would need to be considered when deciding the application.

Notification decision

Will there be preclusion of limited notification/public notification of my application?

PC 7 controlled and restricted discretionary rules (PC 7 decisions version) have a preclusion on limited notification and public notification. This means that there will be no ability to limited or publicly notify the application if the activity meets the controlled or restricted discretionary rules in PC 7.

However, this preclusion only applies once the rules are beyond challenge. If we process the application before this, we will still need to make a determination on public notification and limited notification in accordance with s95 of the RMA and any direction of the rules in the operative RPW that relate to your activity.

What if my deemed/water permit application has been lodged with other applications (e.g. damming of water, diversion of water)?

Where there is a notification preclusion on the controlled/restricted discretionary activity to take and use water, the aspects of the proposal not relating to the controlled/restricted discretionary activity are able to be considered for notification purposes (e.g. if the damming is a restricted discretionary activity under the oRPW with no preclusion on limited/public notification the preclusion does not apply to this part of the proposal).

However, this depends on whether or not the applications are processed as a bundle. The Council needs to consider if it processes the applications as a bundle, as in some cases the effects of the activities may not overlap. In those circumstances, the Council may proceed with a 'hybrid' activity status – see the section below on bundled applications. This will be assessed on a case-by-case basis.

What if a notification decision has already been made on my application?

If a notification decision has already been made on an application, the notification decision stands (except in very limited circumstances). This means that if your application has been publicly notified or limited notified, any submissions are still valid (despite a notification preclusion later coming into effect). Depending on the nature of the submissions (i.e. if submitters wish to be heard), a hearing will need to be held and a decision made by a delegated decision maker.

There is the opportunity for a submitter to withdraw their submission or seek not to be heard prior to a hearing. Some submitters may consider this if an application is amended to meet the controlled/restricted discretionary rules of PC 7.

Although the notification decision stands, the s104 substantive decision on the application will consider the amended activity status and the direction of the policies and objectives of PC 7 as the discretion of the decision maker will be restricted to the relevant matters of control or discretion.

Multiple activities and the operative RPW

For some applications, multiple activities have been applied for. These additional activities may enable the water take or support the water take activity. Examples of such other applications include instream or offline damming, retakes of water from reservoirs and water races, diversion of water, discharge of water/contaminants, activities in/near natural inland wetlands and/or the placement of weirs, culverts and passive flap gates.

If additional activities form part of the application and require consent only under the operative RPW or other legislation (e.g. National Environmental Standard for Freshwater Management) then this may affect the overall activity status of the application due to bundling principles.

The bundling principles apply where the activities for consents being sought overlap and are intrinsically linked with one another such that they cannot be realistically or properly separated and should be assessed together as a whole. In that case, the most restrictive activity status will apply to the application and any preclusions on limited notification only apply if the preclusion relates to all the activities that consent is required for. Applications generally should be bundled so that the effects of the proposal can be considered holistically, except for some limited circumstances.

While the RMA does not require the bundling of applications, the concept of bundling is well-established by case law, such that there are only limited circumstances in which not bundling the applications is considered acceptable. Case law indicates that this is when:

- (a) one of the consents sought is a controlled or restricted discretionary activity;
- (b) the scope of the Council's control or discretion in respect of one of the consents is relatively confined; and
- (c) the effects of exercising the two consents would not overlap, impact or have flow-on effects on each other.

This may be relevant for some applications.

Can I unbundle my water permit application under PC 7 from my other consent applications?

If you seek to have the water take and use unbundled and processed separately from other parts of the application, you will need to state this and include supporting documentation/assessment with the application (addressing the above factors). However, it is for the Council to determine whether bundling is required in each circumstance.

Example: Where one application is for a controlled activity, recent Environment Court authority suggests that it may be more appropriate for the effects of the activity to be considered together, but statutory limits must be observed (i.e. a controlled activity must be granted). Nonetheless, if controlled activities require additional consents to be

granted, then the controlled aspect could be granted while other consents are declined, and the overall proposal is still unable to be implemented.

How will PC 7 be considered if I do not unbundle my applications?

Each individual activity will be assessed in accordance with the objectives and policies of the relevant planning document and relevant higher order documents. PC 7 is likely to only be a relevant consideration for the water permit to take and use.

Example: A damming permit forms part of the proposal and consent for the damming is only required under the RPW. Will Council consider or assess any of PC7 provisions in relation to the damming activity given the wording of PC7 (being a standalone section of the RPW)?

Using the above as an example, although PC7 contains standalone provisions specific to replacement permits to take and use surface water, it is still part of the RPW, which is the relevant planning document for both applications (in accordance with section 104). In some cases, the wording of the policy in question will determine which application / aspect of the activity it is primarily relevant to. The provisions of PC7 limit the policies' application to applications to take and / or use freshwater. For the other activities (e.g. damming that is not the replacement of a deemed permit) the Council will assess the specific objectives and policies relevant to that aspect of the proposal. This may mean that the PC7 policies are only relevant to applications to take and / or use freshwater, or replace deemed permits, and that other aspects of the proposal as a whole will assess the relevant RPW provisions. It is noted that as Policy 10A.2.1 and Policy 10A.2.3 applies to all replacements of deemed permits, any damming permit that is sought as a replacement of a deemed permit (for example) will need to address and consider Policy 10A.2.1 and Policy 10A.2.3.

It is appropriate to limit the consideration of policies for the controlled aspect of the activity to those that are relevant to the matters of control, as even if the other policies are considered there is no ability to decline the consent to that aspect of the proposal as a result.

Amendments to applications

We have advice on amendments to applications available in a separate practice note, which is available on our website [practice-note-amendments-to-applications.pdf \(orc.govt.nz\)](https://orc.govt.nz/practice-note-amendments-to-applications.pdf)

An amendment to a consent application can be made at any point prior to the decision being made by the consent authority. However, an amendment must be within the scope of the original application, as defined by the original application. An amendment would be considered to go beyond the scope of the original application if it is significantly different in terms of the scale or intensity of the proposed activity, or the altered character or effects/impacts of the proposal. This will be determined on a case-by-case basis.

How do I consider my other activities/applications when I am preparing my Amendment documentation?

When you are completing the amendment form you will need to consider whether you are seeking any changes to any activities that require consent under our other plans and other parts of the oRPW and let us know if you are making changes to those parts of your application, including why the changes are in scope of the original application lodged.

Will you 're-make' a notification decision on an application?

Amendments to an application can be made before or after the application has been notified, and an amendment to an application could result in additional persons being required to be notified. However, once a notification decision has been made, the Council is functus officio. This means that once a notification decision has been made, the duty of the decision-maker has been discharged and the ability to vary the decision is lost. While there are some statutory exceptions, these are generally restricted to the correction of errors. This means that once a notification decision has been made, it is generally not able to be reconsidered by the Council.

Example: if the Council has made a notification decision on an application and following notification the applicant amends the application (e.g. amends the consent duration sought), the Council cannot re-make its notification decision on the amended application. If the applicant wanted the Council to remake its notification decision, it would need to lodge a fresh application. This means that persons notified of a resource consent application are unable to be "un-notified".

The above applies despite any notification preclusions that could apply in the event that the activity is amended to fall under a different rule / activity status, as the right to participation has already been granted and cannot be taken away by the Council.
