

Anticipated and known adverse effects of the Project on the environment

Assessments to support the application	Construction	Operation
Noise	✓	✓
Traffic, transportation and vehicle access	✓	✓
Geotechnical	✓	
Earthworks, Erosion and Sediment	✓	
Hazardous Substances storage and use	✓	✓
Contaminated Soil disturbance	✓	
Ecology	✓	✓
Landscape and Visual	✓	✓
Archaeological disturbance	✓	
Glint and Glare		✓
Highly productive land use change	✓	✓
Cultural Impact	✓	✓
Natural hazards - flooding and stormwater	✓	
Radio Interference		✓
Aviation	✓	✓

All the known and anticipated adverse effects of the project are able to be realistically predicted and assessed and effectively managed through design, construction and operation methodologies and consent conditions.
