Kia ora,

A further addition to the application and proposal is related to the 90 Mile Beach, Te Oneroa a Tohe. The reason we have applied for such a vast amount of ocean space is for research and educational purposes with a commercial lense. We are in the middle of lodging an application to MPI for a special fisheries license. This application is on behalf of the 5 Muriwhenua tribes. We are seeking to investigate how we may collect spat/seaweed directly from Tangaroa and increase I survivability.

If you have any further patai, please contact myself or Cale Silich.

Morena Penetaui

We require some further information in order to process your application for the Muriwhenua Aquaculture project.

1. Details on the size (i.e hectares) for each of the 9 identified sites.
2. Details of the project – i.e. are these proposed as shellfish farms and, if so, the infrastructure requirements for such farms (for example: the project seeks construction and installation of marine farming infrastructure (seabed, sub-surface and surface) and associated marine safety and navigation infrastructure.)

Could we please have this information by 5pm Thursday 30 May 2024.

Nga mihi
