Dear Simon,

Current Ohmio Deployment Information

As a proud NZ-based developer of Autonomous Shuttle vehicles, Ohmio welcomes the opportunity to be the proposed provider of advanced Sunbus autonomous shuttle transport services within the Sunfield neighbourhood.

Ohmio Automotion was established in Auckland in 2017, and is proud to have developed the world-leading Ohmio LIFT autonomous shuttle vehicle. The LIFT is now being used in projects throughout the world, while the core development is still being undertaken in NZ.

The Sunfield vision is ideally aligned with a key intended application of the Ohmio LIFT, in providing environmentally friendly, efficient on-demand transport services within a smart community precinct.

Current Ohmio deployments around the world include:

Location	Project description
New York, USA	Demonstration of 3-vehicle close platooning in 2023. Commencing project to provide shuttle service in JFK Airport carpark
South Korea	Multiple active shuttle service projects in multiple cities since 2020. These cities include Gangneung, Sejong, Busan and Suncheon, with a shuttle service in Seoul to commence in early 2025.
Luxembourg	Project with partners to demonstrate enhanced vehicle capabilities Provision of shuttle service in Belval neighbourhood
Netherlands	Currently undertaking testing in preparation for provision of shuttle service in major airport
England, UK	Two shuttle service projects in Milton Keynes. Imminent projects in other locations
Finland	Commencing project to provide cold weather climate shuttle service
Sydney, Australia	Project with partners to demonstrate enhanced vehicle capabilities since 2021 Active development of further vehicle capabilities
New Zealand	Vehicle demonstrations in multiple cities since 2017 Active development of further vehicle capabilities

Please don't hesitate to contact me if you would like any further information about Ohmio's vehicles or projects.

Yours sincerely,

Andrew Mehaffey
