| 24/07/2020 | Matt Luscombe, Cam Twigley (BTW) | Department of Conservation | s 9(2)(a) | Meeting | Introduction to the project was provided to s 9(2)(a) by Matt and Cam including potential to look at Fast Track consenting process. Cam provided a summary of consultation undertaken with iwi and hapū. | Agreed to provide s 9(2)(a) with the results of the summer bird monitoring and to seek DOC's feedback. |
| 28/10/2020 | Matt Luscombe, Cam Twigley (BTW) Karin Sievwright and Stephen Fuller (Boffa Miskell) | Department of Conservation | s 9(2)(a) | Meeting | Update was provided on the project progress, including schedule and intention to make an application under the Fast Track Consenting Act. Discussed the consultation that had been undertaken with iwi and hapū. Boffa provided a summary of their bird monitoring and draft ecological assessment. DOC queried the potential for migratory birds to fly across the site, noted that migratory birds had been detected during the monitoring and queried about the potential for bittern to inhabit the site. Boffa responded that there is no evidence that there will be any adverse effects for migratory birds of concern, and that it would be very difficult to monitor for the presence of bittern. DOC also raised the issue of monitoring. Boffa considered the site warranted a more paired back approach to monitoring than other wind farm sites. Hiringa discussed developing a pest control programme. DOC would be open to this. Hiringa summarised the Fast Track Consenting process and explained that DOC would be invited to make comment. | Hiringa asked DOC to let Hiringa know if it had any residual queries or concerns following the meeting. Confirmed that bat recordings obtained by Hiringa would be analysed and the assessment updated within the next 3-4 weeks. Agreed to provide a final version of the assessment to DOC along with an update on the Fast Track application. Agreed to meet again in a couple of weeks time to discuss any further matters. |
