Re: Southern Parallel Sports Campus Limited Investment

This document serves to set out the seed capital investments and invested advisory services for the funding of SPSC Project research, planning, strategy, and development of the project.

The schedule below sets out the annual investment received to develop the project to this point, much of the work in terms of time and effort has been 'donated' by leading advisors both nationally and internationally, saving SPSC significant cost. These hours have been deemed an investment in the project and will be reflected in financials by KPMG.

The following schedule sets out seed capital investment, private funding and 'invested' advisory services to bring the project to fruition during period 2019 to 2023.
